Youth Digital Health and Online Platforms Martyna Gliniecka, 2024-12-27 *Youth Digital Health and Online Platforms* focuses on young people's use of the digital platform Reddit for health. Drawing upon dialogism theory, the book explores how young people produce a youth-led discourse of youth digital health, different from the adult-led framing represented in youth digital health research policy and service delivery. Peer-led discussions online remain one of the controversial forms of youth digital health associated with negative peer influence or casual teenage talk. This book argues that online peer-led dialogues support young people's agency in health and that young people can benefit from dealing with health issues with peers. The work is based on the digital ethnography of teenagers' subreddits on Reddit and utilises a theoretical framework of dialogism, a linguistic-based theory originated by an early 20th-century Russian philosopher Mikhail Bakhtin. The book introduces the concept of dialogical youth-led youth digital health discourse formed in the peer-led space of Reddit. This youth-led discourse celebrates equality and diversity amongst people, meanings, and opinions. It is constructed around three relational elements: socio-material affordances, creative practices, and a plurality of youth voices. Reddit's pseudonymous, anti-authoritarian, and egalitarian

nature supports the emergence of this youth led discourse The book can interest scholars and lecturers in childhood and youth studies Internet studies and youth health studies Professionals such as policymakers service designers deliverers online safety educators and global youth and health agencies can use evidence based insights in their work with young people

Understanding Reddit Elliot T. Panek, 2021-12-24 This book offers a comprehensive scholarly overview of Reddit one of the most popular and least studied social platforms of the early 21st century The book inspires new ways of thinking about Reddit considering it from multiple perspectives through a historical lens as a site where identity is forged as a democracy as a community and as a news aggregator and distributor By bringing theories from computer mediated communication communication studies and sociology to bear on original large scale observational analyses of Reddit s communities this book provides a uniquely comprehensive overview of the platform s first 15 years Understanding Reddit will help us make sense of how rapidly growing communities function in an era of mass online anonymity Serving both as a primer on how social behavior on Reddit plays out and as a way of locating it within multiple theoretical traditions the book will offer important insights to scholars and students in the disciplines of communication media studies information science internet and emerging media studies and sociology

Reading Audio Readers Karl Berglund, 2024-01-11 The first computational study of reading to focus on audiobooks this book uses a unique and substantial set of reader consumption data to show how audiobooks and digital streaming platforms affect our literary culture Offering an academic perspective on the kind of user data hoard we associate with tech companies it asks when it comes to audiobooks what do people really read and how and when do they read it Tracking hundreds of thousands of readers on the level per user and hour Reading Audio Readers combines computational methods from cultural analytics with theoretical perspectives from book history publishing studies and media studies In doing so it provides new insights into reading practices in digital platforms the effects of the audiobook boom and the business models for book publishing and distribution in the age of streamed audio

From Text to Understanding Miloš Švaňa, František Zapletal, Miroslav Hudec, 2025-09-26 Social media and other sources of text data are still underutilized resources in public decision making Most public organizations and governmental bodies rely mainly only surveys interviews and other traditional methods for gathering opinions One issues is a lack of easy to use tools for mass text data processing that would enable these organizations to process and understand this type of data This book introduces a novel text data analysis framework designed for public decision making specifically on the level of municipalities The framework combines sentiment analysis with topic modelling and a fuzzy based approach for capturing the diversity in sentiment arising from the fact that different people have different opinions on a given topic The book is recommended for practitioners in public decision making as well as researchers analyzing large amounts of text data in order to understand people s opinions

Build a Reddit-like Messaging Board with React and Firebase Richard Gill,2017 In this course you will learn how to build a message board website similar to the Reddit using the latest and greatest web technologies including React the reactive web framework developed by Facebook and Firebase the real time serverless messaging framework from Google Resource description page [Explainable AI Framework Through Multi-context Multi-dimensional Graph Neural Network](#) Vijaya Kumari Yeruva,2023 In this research we explored the multifaceted realm of digital communication emphasizing social media channels such as Twitter and Reddit complemented by conventional data gathering techniques like focus group discussions and structured digital sources like ancient Greek literature By fusing these data types we accessed a vast array of user generated content amalgamating sentiments themes and contextual cues deeply rooted within online communities Advanced computational methods including sentiment analysis and topic modeling were employed to interpret this vast data ocean However traditional algorithms struggled to encapsulate the intricate interconnections in social media ecosystems focus group interactions and classic literature primarily due to their inherent linearity We adopted Graph Neural Networks GNNs a sophisticated machine learning paradigm adept at handling graph based data to surmount these obstacles GNNs displayed a flair for harnessing the relational dynamics inherent in complex systems such as social media focus groups and literature explaining the symbiosis between sentiment context and digital community These relationships were converted into dense vector representations capturing the nuanced interrelations of the graph constituents This venture provided profound insights into the fabric of digital communication steering in a groundbreaking method to identify community structures within digital platforms The efficacy of this innovative approach was evident presenting enhanced and more organic methods to model the intricate interplay within these networks Expanding on this foundational work our objective became harnessing GNNs to extract richer contextual portrayals of user interactions in the digital space aiming for transformative effects on digital communication Capturing the multiple contexts from the digital data we can provide more insights into the GNN models during learning Muti context embedding can explain why a GNN model worked best for a data set Confronted with the intricacy of disparate and unstructured digital data we pioneered the Explainable AI framework via

Multi Context Multi Dimensional Graph Neural Networks MMGNN This holistic solution facilitated the preservation of conversational nuance streamlined dialogues and pinpointed shared views or discord in conversations The clarity our graph based representation provides ensures a more trusted data comprehension In our research we engaged deeply with data from focus group meetings ancient Greek dramas and Reddit to unpack the potential of MMGNN Utilizing MMGNN we outstripped benchmark performances in classification tasks compared to the TextGCN and BertGCN This methodology enabled superior management of diverse and unstructured data paving the way for immediate MMGNN applications

A *Phenomenological Study of Social Media* Liam Mitchell, 2012 Optimists used to suggest that the anonymity of the internet allows people to interact without prejudices about race sex or age Although some websites still foster anonymous communication their popularity pales in comparison with sites like Facebook that foreground identifying characteristics These social network sites claim to enrich their users lives by cultivating connections but they sometimes have the opposite effect Given the widespread and growing use of social media my research poses the following questions Does a particular form of dis engagement with the world flow from the reduction of the person to a profile Does this dis engagement extend beyond social media possibly into the way that we understand the world as such What can we conclude about the broader theoretical framework in which an analysis of social media might be couched I answer these questions through Martin Heidegger s work which provides the theoretical orientation for the dissertation as a whole Noting that history informs the way that he understands ontology Chapter One I argue that the social changes that are accompanying the spread of the internet suggest modifications to his characterizations of boredom Chapter Two and technology Chapter Three I then turn to three emblematic social media sites Facebook which renders its users connected and identifiable Chapter Four Reddit which gathers its users into a pseudonymous community of common interest Chapter Five and 4chan which demands that its users engage in an anonymous fashion Chapter Six and analyze them using the framework developed above while drawing from them to alter that framework further I claim that although the patterns of use apparent on these sites differ they all express different aspects of the mood that holds sway over the internet Social media is both the cause of and solution to boredom and it is shaping a generalized mood that is coming to seem ontological in its purchase
