Artificial Intelligence in Daily Life

Raymond S. T. Lee, 2020-08-22

Given the exponential growth of Artificial Intelligence (AI) over the past few decades, AI and its related applications have become part of daily life in ways that we could never have dreamt of only a century ago. Our routines have been changed beyond measure by robotics and AI, which are now used in a vast array of services. Though AI is still in its infancy, we have already benefited immensely. This book introduces readers to basic Artificial Intelligence concepts and helps them understand the relationship between AI and daily life. In the interest of clarity, the content is divided into four major parts. Part I: AI Concepts presents fundamental concepts of and information on AI, while Part II: AI Technology introduces readers to the five core AI Technologies that provide the building blocks for various AI applications, namely: Machine Learning (ML), Data Mining (DM), Computer Vision (CV), Natural Languages Processing (NLP), and Ontology based Search Engine (OSE). In turn, Part III: AI Applications reviews major contemporary applications that are impacting our ways of life, working styles, and environment, ranging from intelligent agents and robotics to smart campus and smart city projects. Lastly,

Part IV Beyond AI addresses related topics that are vital to the future development of AI. It also discusses a number of critical issues such as AI ethics and privacy, the development of a conscious mind and autonomous robotics in our daily lives. **AI for Daily Life: 50 Simple Ways Artificial Intelligence Makes Everyday Living Smarter** Dizzy Davidson, 2025-07-23

Federico Cugurullo,Tan Yigitcanlar,Xiaoling Zhang,Vincent J. Del Casino Jr.,Natalie Marie Gulsrud,Sarah Barns,2023-10-18 Artificial intelligence AI is now mediating and in some cases seen to be controlling key urban services and infrastructures thus becoming a prominent feature of the contemporary city As portrayed in recent studies the autonomous city can be understood as a city where urban artificial intelligences perform tasks and take on roles which have traditionally been the domain of humans At stake in these debates are questions related to the meaning and ongoing role of intelligence for both humans and machines While autonomous cars transport people service robots run shops drones deliver goods and city brains govern entire cities humans are redefining the meaning of what smart means in the city and what role the human being may

play in future urban spaces With humans shifted to new sectors of the economy or pushed aside by algorithms and robotic agents creating new ways of seeing and governing the city we raise the question as to whether or not cities are becoming more autonomous from human experience in the sense that their operation does not rely as much on human inputs anymore

Structure of Everyday Life Philip Agre, Massachusetts Institute of Technology. Artificial Intelligence Laboratory, 1988 A running argument means continually redeciding what to do Continually redeciding what to do is more flexible than executing a plan because it is more responsive to opportunities and contingencies It is possible to approximate the ideal of continual redecision because life is wholly a routine The routine portion of the reasoning leading to each moment's action can be implemented very efficiently by recording the reasons behind any novel bits of reasoning a method known as dependency maintenance A computer program called the running argument illustrates this point [AI in Everyday Life - Tales of](#)
