Capitalism And Class In The Gulf Arab States:

Capitalism and Class in the Gulf Arab States Adam Hanieh, 2016-04-30 This book analyzes the recent development of Gulf capitalism through to the aftermath of the 2008 economic crisis. Situating the Gulf within the evolution of capitalism at a global scale, it presents a novel theoretical interpretation of this important region of the Middle East political economy.

Lineages of Revolt Adam Hanieh, 2013-10-14 While the outcomes of the tumultuous uprisings that continue to transfix the Arab world remain uncertain, the root causes of rebellion persist. Drawing upon extensive empirical research, *Lineages of Revolt* tracks the major shifts in the region's political economy over recent decades. In this illuminating and original work, Adam Hanieh explores the contours of neoliberal policies, dynamics of class and state formation, imperialism, and the nature of regional accumulation. The significance of Palestine and the Gulf Arab states and the ramifications of the global economic crisis are explored. By mapping the complex and contested nature of capitalism in the Middle East, the book demonstrates that a full understanding of the uprisings needs to go beyond a simple focus on dictators and democracy. *American Journal of Islamic Social Sciences* 30:3

Ahmad, John Andrew Morrow, Ovamir Anjum, Omer Bin Abdullah, Jay Willoughby, 2013-06-11 The *American Journal of Islamic Social Sciences* (AJISS) established in 1984 is a quarterly double-blind peer-reviewed and interdisciplinary journal published by the International Institute of Islamic Thought (IIIT) and distributed worldwide. Anita Hammer, Adam Fishwick, 2020-03-28 Part of the *Critical Perspectives on Work and Employment* series, this edited collection brings together contributions from leading international scholars to initiate an important dialogue between labour process analysis and scholarship on work in the Global South. This book characterises the forms of work and labour process that characterise globalising capitalism today and addresses core analytical concerns within Labour Process Theory and research on work in the South. It explores how a wide range of production relations in the Global South, ranging from formal to informal employment and self-employment, are embedded in wider social relations of gender, caste, religion, and ethnicity and are related to wider patterns of commodification and resistance. Drawing on cutting-edge research, the book's chapters consider a diverse range of working situations, covering migrant workers in the Middle East, commercial surrogacy work in India, and cooperative garment workers in Argentina. In offering a novel reading of the political economy of work in the Global South and shedding light on lesser-considered fields of work and worker organization, this volume will provide new insights for making sense of the changing world of work for students, scholars, labour activists, and practitioners alike. Rising

Powers and State Transformation Shahar Hameiri, Lee Jones, John Heathershaw, 2020-07-10 *Rising Powers and State*

Transformation advances the concept of state transformation as a useful lens through which to examine rising power states foreign policymaking and implementation with chapters dedicated to China Russia India Brazil Indonesia and Saudi Arabia The volume breaks with the prevalent tendency in International Relations IR scholarship to treat rising powers as unitary actors in international politics Although a neat demarcation of the domestic and international domains on which the notion of unitary agency is premised has always been a myth these states uneven integration into the global political economy has eroded this perspective s empirical purchase considerably Instead this volume employs the concept of state transformation as a lens through which to examine rising power states foreign policymaking and implementation State transformation refers to the pluralisation of cross border state agency via contested and uneven processes of fragmentation decentralisation and internationalisation of state apparatuses The volume demonstrates the significance of state transformation processes for explaining some of these states key foreign policy agendas and outlines the implications for the wider field in IR With chapters dedicated to all of today s most important rising power states Rising Powers and State Transformation will be of great interest to scholars of IR international politics and foreign policy The chapters were originally published as a special issue of Third World Quarterly Global Media Giants Benjamin Birkinbine,Rodrigo Gomez,Janet Wasko,2016-07-01 Global Media Giants takes an in depth look at how media corporate power works globally regionally and nationally investigating the ways in which the largest and most powerful media corporations in the world wield power Case studies examine not only some of the largest media corporations News Corp The Microsoft Corporation in terms of revenues but also media corporations that hold considerable power within national regional or geolinguistic contexts Televisa The Bertelsmann Group Sony Corporation Each chapter approaches a different corporation through the lens of economy politics and culture giving students and scholars a thoughtful and data driven guide with which to interrogate contemporary media industry power

Emerging Global Cities Alejandro Portes,Ariel C. Armony,2022-12-27 Certain cities most famously New York London and Tokyo have been identified as global cities whose function in the world economy transcends national borders Without the same fanfare formerly peripheral and secondary cities have been growing in importance emerging as global cities in their own right The striking similarity of the skylines of Dubai Miami and Singapore is no coincidence despite following different historical paths all three have achieved newfound prominence through parallel trends In this groundbreaking book Alejandro Portes and Ariel C Armony demonstrate how the rapid and unexpected rise of these three cities recasts global urban studies They identify the constellation of factors that allow certain urban places to become emerging global cities centers of commerce finance art and culture for entire regions The book traces the transformations of Dubai Miami and Singapore identifying key features common to these emerging global cities It contrasts them with global hopefuls cities that at one point or another aspired to become global and analyzes how Hong Kong is threatened with the loss of this status Portes and Armony highlight the importance of climate change to the prospects of emerging global cities showing how the same

economic system that propelled their rise now imperils their future Emerging Global Cities provides a powerful new framework for understanding the role of peripheral cities in the world economy and how they compete for and sometimes achieve global standing Icarus Brian Brivati,2021-07-20 In 2017 Arif Naqvi and The Abraaj Group were on the brink of changing the world of private equity Abraaj was a pioneer of impact investing it had helped transform communities and companies across the world by financing healthcare education and clean energy projects and it was about to close a new fund worth 6 billion But then it all came crashing down On 10 April 2019 after landing at London Heathrow Naqvi was arrested on fraud charges He is facing extradition to the United States and a prison sentence of up to 291 years if he is found guilty The dominant media narrative has painted Naqvi as a thief and fraudster the key man in an organised criminal conspiracy But in this explosive book which is based on extensive research and interviews Brian Brivati investigates how things are not quite what they seem Icarus explores how Abraaj found itself caught in the middle of a geopolitical war between the United States and China and when it would not back down economic hitmen tried to wipe it out **Money, Markets, and Monarchies** Adam Hanieh,2018-09-13 Framed by a critical analysis of global capitalism this book examines how the six states of the Gulf Cooperation Council are powerfully shaping the political economy of the wider Middle East Through unprecedented and fine grained empirical research encompassing sectors such as agribusiness real estate finance retail telecommunications and urban utilities Adam Hanieh lays out the pivotal role of the Gulf in the affairs of other Arab states This vital but little recognised feature of the Middle East s political economy is essential to understanding contemporary regional dynamics not least of which is the emergence of significant internal tensions within the Gulf itself Bringing fresh insights and a novel interdisciplinary approach to debates across political economy critical geography and Middle East studies this book fills an important gap in how we understand the region and its place in the global order *Arab Middle Class* Khalid Abu-Ismaïl,2014 *Accumulations, Crises, Struggles* Baris Karaagac,2013 This book is about the most recent phase or stage of capitalist development neoliberal globalization Neoliberalism as much a political project as an economic one is still pervasive and it continues to provide the general framework for politics and political imagination across most of the globe The book brings together a group of scholars from different parts of the world looking at the impact of neoliberalism on societies And as such it contributes as much to the critique and overcoming of this process as to its analysis With its extensive coverage both geographically and thematically the book will be of interest for students of the social sciences as well as for anyone making an effort to understand and change the world Series Politics Society and Community in a Globalizing World Vol 15 **Arab Middle Class** ,2014 The present report studies the Arab middle class an important social group that is relatively little understood despite the fundamental role it has played in shaping the economic and social development outcomes in the Arab region This report contributes to the ongoing debate about factors that led to the Arab uprisings and the difficult transitions to democracy that followed the departure of long standing dictators by

marking elements influencing middle class allegiances specifically those that weakened their well established alliances with ruling regimes The report is motivated by the conviction on the basis of past development experiences that a new Arab development model can only succeed if the middle class plays a lead role in designing and implementing processes of economic transformation and political transition Studying the middle class is therefore crucial to interpreting the past understanding the present and reading the potential future development prospects of the Arab region This report introduces three novel approaches aimed at charting a path for sustaining empowering and enlarging the middle class The first is related to the measurement of the middle class based on a definition that takes into account both the quantity and quality of their consumption expenditure The second relates to the profiling of the Arab middle class using variables such as education employment and mobility in addition to multidimensional poverty The third novel approach lies in using these results to provide a narrative of the socioeconomic context of the decade leading up to the uprisings from a middle class perspective The report concludes that the empowerment of the Arab middle class could pave a way out of the current development and governance debacle towards an Arab developmental State Publisher s description **Political Crossroads** ,2003
