Schofield, 2000-03-01 101 Social Studies Activities for Curious Kids is a unique collection of easy and enjoyable writing activities designed to stimulate social awareness creative thinking and self expression in children ages six and older Embracing the author's if it's fun kids will do it educational philosophy this book lets children explore the fundamental nature of community by getting them to write about what they know best themselves Divided into five critical social science strands Relationships Rules and Responsibilities Traditions and Celebrations Days Gone By My Community and The Global Village this book uses simple directions and descriptive written examples to lead children through 101 timeless activities that will help them to establish important connections between past present and future to develop a basic understanding of heritage and citizenship and to begin to decipher their role as social beings in the local community and society at large **Benefit from unobtrusive contexts: Towards the recognition of short and non-periodic activities** Andreas Jahn, 2018-01-22 Context aware systems can be used in a multitude of scenarios and applications Examples include a pedestrian safety system

which can help to detect a potential upcoming accident based on the knowledge of the pedestrian's activity. In the field of human activity recognition, a majority of research focuses on long lasting and continuous activities such as walking or attending a dinner. Yet the recognition of short and non periodic activities such as stepping onto the road is still poorly understood. Due to the non periodic nature, missing or incorrect recognitions of such activities imply that the entire activity is not recognized and remains unknown. This thesis focuses on short and non periodic activities, gives a definition and investigates three challenges in their recognition: inconsistent sensor data, overrepresentation of periodic activities, and evaluation of the recognition. For each challenge, a possible solution is proposed. It is shown that applying these solutions addresses the challenges and improves the recognition rates of short and non periodic activities up to 20%.
