Cloning Christ A Challenge Of Science And Faith:

The CRISPR Revolution in Science, Religion, and Ethics Arvin M. Gouw,Ted Peters,2025-01-23 This collection of original essays by scientists theologians religious studies scholars and ethicists offers an authoritative illuminating and thought provoking overview of the CRISPR controversy Genetic science at times ignites explosions of public controversy In the early 1990s the Human Genome Project along with Jurassic Park frightened the world with genetic determinism The cloning controversy of 1997 and the stem cell controversy of 1998 prompted bitter moral stand offs The fuse has just been lit for the next explosion the CRISPR controversy The CRISPR Revolution in Science Religion and Ethics channels the energy of that explosion into constructive reflection on the implications of this revolutionary science for religion ethics and public policy Chapters accessibly explain the science behind gene editing and draw out its implications for social impact This volume reviews the history of genomics from 1990 to date with special attention to cloning and stem cell research Contributors address the significance of gene technology for understanding human nature within specific religious traditions Most importantly they analyze selected ethical issues therapy versus enhancement germ line modification designer children patenting and the long term effects of gene drive proposals

Religion and the Implications of Radical Life Extension

C. Mercer,D. Maher,2009-08-31 If the science of radical life extension is realized and the technology becomes widely available it would arguably have a more radical impact on humanity than any other development in history This book is the first concerted effort to explore implications of radical life extension from the perspective of the world s major religious traditions

Perspectives on Science and Christian Faith ,2007 T&T Clark Handbook of Christian Theology and the Modern Sciences John P. Slattery,2020-10-01 This handbook surveys the many relationships between scientific studies of the world around us and Christian concepts of the Divine from the ancient Greeks to modern ecotheology From Augustine to Hildegard of Bingen Genesis to Frederick Douglass and physics to sociology this volume opens the intersections of Christian theology and science to new concepts voices and futures The central goal of the handbook is to bring new perspectives to the foreground of Christian theological engagement with science and to highlight the many engagements today that are not often identified as science theology discussions The handbook thus includes several aspects not found in previous handbooks on the same topic significant representation from the three major branches of Christianity Orthodox Roman Catholic and Protestant multiple essays on areas of modern science not traditionally part of the theology and science dialogue such as discussions of race medicine and sociology a collection of essays on historical theologians approaches to nature and science T Catholic Protestant and Orthodox surveys of theology science scholarship in the 20th and 21st centuries and ten explorations in Christian theology today from Einsteinian physics to decolonial sociology The 24 chapters than span the volume offer the reader whether scholar student or layperson an essential resource for any future conversations around science and Christian theology
