POLITICAL POWER IN THE AGE OF OIL

Carbon Democracy

**Diana K. Davis, Edmund Burke, Edmund
Burke (III)**

Carbon Democracy:

Carbon Democracy Timothy Mitchell, 2013-06-25 A brilliant revisionist argument that places oil companies at the heart of 20th century history and of the political and environmental crises we now face *Guardian* A sweeping overview of the relationship between fossil fuels and political institutions from the industrial revolution to the Arab Spring *Financial Times* Oil is a curse it is often said that condemns the countries producing it to an existence defined by war corruption and enormous inequality *Carbon Democracy* tells a more complex story arguing that no nation escapes the political consequences of our collective dependence on oil It shapes the body politic both in regions such as the Middle East which rely upon revenues from oil production and in the places that have the greatest demand for energy Timothy Mitchell begins with the history of coal power to tell a radical new story about the rise of democracy Coal was a source of energy so open to disruption that oligarchies in the West became vulnerable for the first time to mass demands for democracy In the mid twentieth century however the development of cheap and abundant energy from oil most notably from the Middle East offered a means to reduce this vulnerability to democratic pressures The abundance of oil made it possible for the first time in history to reorganize political life around the management of something now called the economy and the promise of its infinite growth The politics of the West became dependent on an undemocratic Middle East In the twenty first century the oil based forms of modern democratic politics have become unsustainable Foreign intervention and military rule are faltering in the Middle East while governments everywhere appear incapable of addressing the crises that threaten to end the age of carbon democracy the disappearance of cheap energy and the carbon fuelled collapse of the ecological order In making the production of energy the central force shaping the democratic age *Carbon Democracy* rethinks the history of energy the politics of nature the theory of democracy and the place of the Middle East in our common world

Carbon Democracy

Timothy Mitchell, 2013-05-07 With the rise of coal power the producers who oversaw its development acquired the ability to shut down energy systems a threat they used to build the first mass democracies Oil offered the West an alternative and with it came a new form of politics Oil created a denatured political life the central object of which the economy appeared capable of infinite growth What followed was a Western democracy dependent on an undemocratic Middle East We now live with the consequences an impoverished political practice incapable of addressing the crises that threaten to end the age of carbon democracy namely the disappearance of cheap energy and the carbon fuelled collapse of the ecological order For the updated edition of this classic title Timothy Mitchell has written a new preface reassessing its arguments in the light of recent political events

From 'Carbon Democracy' to 'Climate Democracy'? James Goodman, Tom Morton, 2024-10-11 This book examines these requirements It debates the political constituencies agendas and institutions that are emerging from climate crisis comparing evidence of emergent themes The chapters in this book were originally published as a special issue of *Globalizations*

Global Perspectives on Nationalism Debajyoti Biswas, Panos Eliopoulos, John C. Ryan, 2022-12-16

Global Perspectives on Nationalism takes an interdisciplinary approach informed by recent theorisations of nationalism to examine perennial questions on the topic. The idea of nationalism centres on questions of ethnicity, culture, religion, language and access to resources. What determines consciousness of nationalism? How is nationalism manifested, shaped or countered through literary and cultural productions? The contributors highlight topical areas in studies of nationalism including ecology, natural resources, sustainability, globalisation, the Anthropocene, postcolonialism, indigeneity, folklore, popular culture and queer theory. They develop innovative perspectives on nationalism through in-depth analyses of the theoretical, political, literary, linguistic, cultural and ecological dimensions of nationalism in Argentina, Australia, Bangladesh, Bosnia and Herzegovina, China, Germany, Greece, India, Indonesia, Lebanon, Nepal, Nigeria, Poland, Scotland, Turkey, the United States and elsewhere. This volume underscores the importance of generative dialogue between disciplines in assessing the implications of nationalism for everyday life through five thematic sections: I. Ethnicity, Ideology and Narration; II. Religion, Identity and Heritage; III. Linguistics, Tradition and Modernism; IV. Music, Lyricism and Poetics; and V. Ecology, Environment and Non-Human Lives. This book will be of particular value to students and researchers in philosophy, literary studies and political theory, with interests spanning ecology, ethnicity, folklore, gender, heritage, identity, linguistics, nationalism, nationhood, religion and sexuality.

Pipeline Cinema Mona Damluji, 2025-12-23 A free ebook version of this title is available through Luminos University of California Press's Open Access publishing program. Visit www.luminosoa.org to learn more. *Pipeline Cinema* explores the intertwined histories of documentary film and the oil industry in mid-twentieth-century Iran and Iraq. Reading against the grain of oil company archives, Mona Damluji reveals how wells, pipelines, pumping stations and refineries were sites of cinematic production and exhibition at once normalizing and challenging neocolonial extraction. Shining a light on cultural workers and labor movements, this book offers a distinctly humanistic lens on an otherwise dehumanizing petroleum industry.

Forest Lost Maron E. Greenleaf, 2024-10-07 *Forest Lost* is an ethnography of forest carbon offsets and the wider effort to make the living rainforest valuable in the Brazilian Amazon.

From 'Carbon Democracy' to 'Climate Democracy'? James Goodman, Tom Morton, 2024-10-11 What are the democratic requirements for effective climate action? How can climate democracy be conceptualised? Liberal democracies emerged on the back of fossil fuels, creating what Tim Mitchell called carbon democracy. Three decades of climate policy have affirmed the controlling influence of fossil fuel interests. Runaway climate change now threatens the very foundations of social life. Today we face a very clear democratic question: of whether the fossil fuel sector has the right to determine the planet's climate future. Achieving global energy transformation at the scope and scale needed requires a democratic transformation to overcome the stranglehold. This book examines these requirements. It debates the political constituencies, agendas and institutions that are emerging from climate crisis, comparing evidence of emergent themes. New claims are emerging for green deals, climate justice, energy justice, energy democracy and degrowth, reflecting a new intensity of contestation as climate change impacts deepen. This book will

be of great relevance to students researchers and policymakers with an interest in comparative politics democracy studies climate change and environmental policies The chapters in this book were originally published as a special issue of Globalizations **A History of Energy Flows** Anthony N. Penna,2019-09-18 This book presents a global and historical perspective of energy flows during the last millennium The search for sustainable energy is a key issue dominating today s energy regime This book details the historical evolution of energy following the overlapping and slow flowing transitions from one regime to another In doing so it seeks to provide insight into future energy transitions and the means of utilizing sustainable energy sources to reduce humanity s fossil fuel footprint The book begins with an examination of the earliest and most basic forms of energy use namely that of humans metabolizing food in order to work with the first transition following the domestication and breeding of horses and other animals The book also examines energy sources key to development during the industrialization and mechanization such as wood and coal as well as more recent sources such as crude oil and nuclear energy The book then assesses energy flows that are at the forefront of sustainability by examining green sources such as solar wind power and hydropower While it is easy to see energy flows in terms of revolutions transitions have taken centuries to evolve and transitions are never fully global as for example wood remains the primary fuel source for cooking in much of the developing world This book not only demonstrates the longevity of energy transitions but also discusses the possibility for reducing transition times when technological developments provide inexpensive and safe energy sources that can reduce the dependency on fossil fuels This book will be of great interest to students and scholars of energy transitions sustainable energy and environmental and energy history

,2014 **Environmental Imaginaries of the Middle East and North Africa** Diana K. Davis,Edmund Burke,Edmund Burke (III),2011-12-20 The landscapes of the Middle East have captured our imaginations throughout history Images of endless golden dunes camel caravans isolated desert oases and rivers lined with palm trees have often framed written and visual representations of the region Embedded in these portrayals is the common belief that the environment in most places has been deforested and desertified by centuries of misuse It is precisely such orientalist environmental imaginaries increasingly undermined by contemporary ecological data that the eleven authors in this volume question This is the first volume to critically examine culturally constructed views of the environmental history of the Middle East and suggest that they have often benefitted elites at the expense of the ecologies and the peoples of the region The contributors expose many of the questionable policies and practices born of these environmental imaginaries and related histories that have been utilized in the region since the colonial period They further reveal how power in the form of development programs notions of nationalism and hydrological maps for instance relates to environmental knowledge production **Resurgence** ,2008
