*Physical Assessment for Nurses and Healthcare Professionals* Carol Lynn Cox, 2019-01-09 Physical Assessment for Nurses and Healthcare Professionals offers a practical and comprehensive guide to best clinical practice when taking patient history and physical examination. This accessible text is structured in accordance with the competencies for advanced practice in assessment, diagnosis and treatment as published by the RCN. Following a systematic systems based approach to patient assessment, it includes a summary of the key clinical skills needed to develop and improve clinical examination in order to confidently assess, diagnose, plan and provide outstanding care. In this revised edition colour photographs and case studies have been included to assist health care practitioners in their assessment of the patient. This important guide includes a highly visual colour presentation with photographs and illustrations. Features a wide range of key learning points to help guide practice. Offers illustrative examples, applications to practice and case studies. Written for health care students, newly qualified and advanced nurse practitioners and those in the allied health professions. Physical Assessment for Nurses and Healthcare Professionals is the essential guide for developing the skills needed to accurately access patient history and physical examination.

*Fundamentals of Pharmacology for Children's Nurses* Ian Peate, Peter Dryden, 2021-12-28

Registered Nurses must have thorough knowledge of pharmacology, medicines administration and the effects of medicines. *Fundamentals of Pharmacology for Children's Nurses* is written for nurses and allied health professionals involved in the care of children and young people (CYP) to focus exclusively on pharmacology. Filling a gap in current literature on the subject, this much-needed resource develops the competence and confidence required to prescribe, dispense and administer medicines to children and young people. Emphasising the importance of patient-centered care to CYP, the text describes the role of the healthcare provider working with CYP and their families, explains how to use pharmaceutical and prescribing reference guides, discusses legal and ethical issues, examines pharmacodynamics and pharmacokinetics and more. Helping readers respond appropriately and compassionately to the needs of those receiving care and their families, this textbook covers a wide range of medications used in diabetes, cancer, mental health and other areas. Features a wealth of full colour images and numerous pedagogical tools, including learning objectives, self-test questions and reflective exercises to enable readers to contextualise and assess their knowledge. Presents case studies to reinforce learning and illustrate the application of theory to practice. Provides authoritative and practical guidance on formulations, adverse drug reactions, analgesics, antibiotics, immunisations and the medications most commonly used when providing care to CYP. Includes access to a companion website with interactive MCQs, case studies, references, an image bank and links to further reading and supplemental resources. *Fundamentals of Pharmacology for Children's Nurses* is essential reading for undergraduate children's nursing students, trainee nursing associates, those undertaking healthcare programmes of study, as well as those seeking to better understand pharmacology.
