IMPORTANT

Check your power supply

Please, make sure that your AC line's voltage matches the voltage specified on the nameplate on the bottom panel. In some areas, a voltage selector may be provided on the bottom panel. If the current factory-set voltage does not match the power cord, make sure that the voltage selector is set for the voltage in your area. The voltage selector is set at 240V when the unit is initially shipped. To change the setting, use a "minimum" screwdriver to rotate the selector dial so that the correct voltage appears next to the pointer on the panel.
