

Urology Coding Guidelines

Medical coding is a complex process requiring medical specialty-wise coding skills and relevant experience. Coding gets much more complicated when it comes to urology coding. The Centers for Medicare & Medicaid Services (CMS) understands the complexities of urology coding and publishes urology coding guidelines from time to time. This article contains in-depth urology coding guidelines applicable for the year 2022 onwards.

For these urology coding guidelines, we referred National Correct Coding Initiative (NCCI) policy manual published by CMS in 2022. Note that most of the payers follow Medicare coding guidelines with unique modifications, so you need refer to payer-specific urology coding guidelines for appropriate coding.

- Insertion of a urinary bladder catheter is a component of the global surgical package. Urinary bladder catheterization (CPT codes 51701, 51702, and 51703) is not separately reportable with a surgical procedure when performed at the time of or just prior to the procedure. Additionally, many procedures involving the urinary tract include the placement of a urethral/bladder catheter for postoperative drainage. Because this is integral to the procedure, placement of a urinary catheter is not separately reportable.
