Education, Volume II Norman G. Lederman, Sandra K. Abell, 2014-07-11. Building on the foundation set in Volume I a landmark synthesis of research in the field. Volume II is a comprehensive state of the art new volume highlighting new and emerging research perspectives. The contributors, all experts in their research areas, represent the international and gender diversity in the science education research community. The volume is organized around six themes: theory and methods of science education, research, science learning, culture, gender and society, and science learning, science teaching, curriculum and assessment in science, science teacher education. Each chapter presents an integrative review of the research on the topic it addresses, pulling together the existing research working to understand the historical trends and patterns in that body of scholarship, describing how the issue is conceptualized within the literature, how methods and theories have shaped the outcomes of the research and where the strengths, weaknesses and gaps are in the literature. Providing guidance to science education faculty and graduate students and leading to new insights and directions for future research, the *Handbook of Research on Science Education* Volume II is an essential resource for the entire science education community.
