Commodities and Capabilities Amartya Sen, 1999 **Commodities and Capabilities** Amartya Sen, 1999 **Commodities and Capabilities** Amartya Sen, 1999-06-17 *Commodities and Capabilities* presents a set of inter related theses concerning the foundations of welfare economics and in particular about the assessment of personal well being and advantage The argument presented focuses on the capability to function i e what a person can do or can be questioning in the process the more standard emphasis on opulence or on utility In fact a person s motivation behind choice is treated here as a parametric variable which may or may not coincide with the pursuit of self interest Given the large number of practical problems arising from the roles and limitations of different concepts of interest and the judgement of advantage and well being this scholarly investigation is both of theoretical interest and practical import

Social Policy: An Introduction Blakemore, Ken, Warwick-Booth, Louise, 2013-10-01 What are social policies How are social policies created and implemented Why do certain policies exist The fourth edition of this highly respected textbook provides a clear and engaging introduction to social policy The book has been thoroughly updated to include Changes in social policy introduced by the Coalition government Incorporation of an international perspective throughout as well as a new chapter The global social policy environment Updated pedagogy to stimulate thought and learning Comprehensive glossary Social Policy is essential reading for students beginning or building on their study of social policy or welfare The wide ranging coverage of topics means that the book holds broad appeal for a number of subject areas including health social policy criminology education social work and sociology This textbook has always been a useful teaching resource because it combines substantial and engaging analysis with stand alone extracts The new edition adds a chapter on global social policy updates on the Coalition Government and guides to what is in the book The added activities are well thought out and can be adapted or expanded to suit the needs of particular students Hedley Bashforth Teaching Fellow in Social Policy University of Bath UK Social Policy An Introduction now in its fourth edition and eleventh year will remain a core social policy text on reading lists across the country due to its well written and comprehensive nature Completely revised it has been updated and extended to reflect contemporary developments in social policy including the policy implications of the Coalition Government and now includes a chapter on global social policy environments reflecting the continued internationalisation of social policy debates Updated pedagogical features which include activities for the reader learning outcomes at the start of each chapter and detailed case studies throughout enhance this thought provoking and stimulating text Dr Liam Foster University of Sheffield UK This book provides as it states an introduction to the field and does so by adopting a highly attractive pedagogic style that evidences at

every turn a sensitivity to the approaches to learning of contemporary students Although it is tailored to meet the needs of primarily first year specialist students it is equally suitable for those on other programmes who are taking an option in social policy Because the book anticipates theoretical issues and debates and students will confront as they progress to a more advanced level it will also retain value as be a longer term reference resource I will certainly be citing it on a second year core course I teach It is immediately clear that a great deal of thought has been invested into designing this book What Blakemore and Warwick Booth have produced is a clearly laid out and well structured analysis of impressive breadth that is a readily accessible learning instrument both for student and teacher Importantly it provides numerous opportunities to experiment with new ways of approaching the teaching of the subject Each chapter sets out clearly expressed learning outcomes with a fair balance of theoretical and empirical concerns Visual displays in box material graphs and flow charts provides a most effective means for absorbing the large amount of ground covered There is good incorporation of statistical material and up to date policy developments Students are also encouraged to exploit useful links to internet and other media sites Particularly attractive from a teaching point of view are the range of tasks set for the students which are aimed clearly at rapid capacity building Chapters end by listing the key terms and concepts addressed to aid revision of material This is repeated in the glossary at the end of the book Most of the materials are derived from the British context but there is also a secondary focus on EU member states and beyond as well as a good chapter on global social policy Steen Mangen

Bina Agarwal, Jane Humphries, Ingrid Robeyns, 2007 Commodities and Capabilities Amartya Kumar Sen, 1987 **Human Development and the International Development Strategy for the 1990s** Keith Griffin, J. Knight, 1990-11-19 The book makes a strong and convincing case for a renewed emphasis on human development both to foster economic growth and as an end in itself Policies for human development enhance the capabilities of people to be and to do things This book brings together contributions by recognised experts on various aspects of human development educational policy health and nutrition technological capabilities and the harnessing of local resources and builds on them to advocate a redirection of policies for the 1990s *Worker Identity, Agency and Economic Development* Elizabeth Hill, 2010 More than nine out of every ten working women in India are employed in the informal economy unprotected by labour laws and excluded from basic forms of social security They work as daily labourers in the fields small producers and industrial outworkers in their own homes and as vendors on the streets These workers typically receive very low wages and experience extreme forms of social economic and political marginalisation This book examines what types of interventions can improve the well being of women working in the Indian informal economy Using the case study of the Self Employed Women s Association Worker Identity Agency and Economic Development argues that work life reform for informal women workers has moral and social dimensions as well as economic Drawing on the work of social philosopher Axel Honneth the book argues that worker agency

is critical to the process of work life reform in the informal economy Using empirical data collected amongst SEWA members the study shows that there is a positive and developmental relationship between a worker s identity or psychological integrity and her actual capacity to engage in the political economy for constructive change The study shows that membership based organisations can promote the social foundations of recognition and respect that are critical to identity and agency as well as provide worker s with real opportunities to develop alternative non exploitative economic institutions that deliver improved wages and social security But in organizing informal workers for collective action the existing distribution of power and wealth as well as gender privilege are challenged The result is social conflict and sometimes violence Conflict of this nature is endemic to the development process but is often overlooked in development literature and policy design The book will be of interest to development scholars and practitioners as well as those interested in the dynamics of women s empowerment and socio economic change for informal economy workers **Official Records** ,1989 *Analysis of Socio-Economic Conditions* Gianni Betti,Achille Lemmi,2021-03-30 Showcasing fuzzy set theory this book highlights the enormous potential of fuzzy logic in helping to analyse the complexity of a wide range of socio economic patterns and behaviour The contributions to this volume explore the most up to date fuzzy set methods for the measurement of socio economic phenomena in a multidimensional and or dynamic perspective Thus far fuzzy set theory has primarily been utilised in the social sciences in the field of poverty measurement These chapters examine the latest work in this area while also exploring further applications including social exclusion the labour market educational mismatch sustainability quality of life and violence against women The authors demonstrate that real world situations are often characterised by imprecision uncertainty and vagueness which cannot be properly described by the classical set theory which uses a simple true false binary logic By contrast fuzzy set theory has been shown to be a powerful tool for describing the multidimensionality and complexity of social phenomena This book will be of significant interest to economists statisticians and sociologists utilising quantitative methods to explore socio economic phenomena Gandhi Marg ,1992 **Ethics and International Relations** Ethan B. Kapstein,Joel H. Rosenthal,2009 The essays in this volume offer a new dimension to realist theories about world politics Firstly they emphasize the possibilities of cooperation and accommodation through agreement over common motivations and concerns and secondly they demonstrate that moral considerations can and do play a significant role in shaping state behavior and that despair about the possibility of improving the systems and institutions within which we live is unwarranted The articles are based around three ethical concepts which form the core of the realism reconsidered approach namely the ideas of pluralism rights and fairness *Report of the Independent Expert on the Question of Human Rights and Extreme Poverty* Arjun Sengupta,2007 Builds upon two earlier reports on extreme poverty as well as a mission report on extreme poverty conditions in the United States and takes into account observations of the Expert Seminar on Extreme Poverty and Human Rights in Geneva in 2007 **Software Industry** ,1993 *New Directions in Development Economics* Amitava

Krishna Dutt, Kenneth P. Jameson, 1992 The decade of the 1980s represented a notable deviation from the widespread and significant development advances of the previous 30 years This was reflected in an extensive re examination of the theoretical and empirical bases of development economics This major new book written by a group of distinguished economists provides the new directions needed for confronting the continuing challenge of development Lance Taylor Joseph Stiglitz and Amitava Dutt focus primarily on recent theoretical developments and highlight significant advances in several areas especially in new structuralist and new neoclassical approaches Ajit Singh Keith Griffin and Kenneth Jameson present a refreshing perspective on the recent experience of developing countries and the prospects of development in coming decades The main thesis of the book is that the 1980s represented a clear break in the development processes but the 1990s and beyond hold the possibility of a viable re direction of development and development economics **Economics of Amartya Sen** Ajit Kumar Sinha, Raj Kumar Sen, 2000 Contributed articles presented to Indian Economic Association *Michigan Journal of International Law* , 2004 *Environmental Ethics and Philosophy* John O'Neill, R. Kerry Turner, Ian Bateman, 2001 Sustainability and sustainable development have become key phrases of the politics of the environment They are at the centre of much environmental discourse and indeed of the series of which this collection is a part This major volume brings together a number of recent papers that address the ethical and political assumptions that underlie different uses of those concepts Part I examines equality and justice Part II focuses on justice equality and future generations Part III deals with the moral considerability of the non human world and Part IV looks at environmental justice Part V examines economic valuation and Part VI discusses sustainability Part VII covers sustainability and nature This volume will be an invaluable source of reference for scholars of environmental economics environmental political theory environmental ethics and geography and all those concerned with the philosophical foundations of sustainability **World Economy in Transition** Surendra J. Patel, 1986 Original essays written to pay tribute to the work of Surendra Patel Since its inception more than a decade ago Dr Patel has been Director of the UNCTAD Technology Division which has made the pioneer contribution to the adoption of an entirely new approach in theory and practice to technology in the development process Several of the essays are on aspects of this subject while others are on the theory and strategy of development also in its historical setting and the application thereof to different regions of the developing world
