**Tableau LiveLessons** Lindy Ryan, 2019. 4 Hours of Video Instruction. Put learning into practice with Tableau LiveLessons for the aspiring visual data storyteller. There is a data revolution happening across the globe. From academics to politics and everywhere in between, the world's stories are being told through their data points. Although telling stories about data isn't new, we are now telling them in ways that are more meaningful and impactful than ever before as an emerging new class of visualizations attempts to tell the world's stories through the power of data visualization. However, visual data storytelling is not an inherent skill, and data stories differ from traditional storytelling in many ways. Further, while robust visualization tools support rich and diverse forms of visual data storytelling, crafting a compelling data narrative is not a process that we can rely on a tool to do for us. These lessons provide a hands-on foundation for users to learn how to craft visual data narratives using the most appropriate visualizations, apply visual design to engage their audience, and purposefully structure a narrative framework to deliver a compelling, actionable data story that invites discovery, solicits new questions, or offers alternative explanations, all using one of the most powerful and ubiquitous visualization tools on the market today: Tableau. **Skill Level: Beginner.** Learn how to tell visual stories that communicate insights and make an impact. Leverage questions to design logical and fruitful data collection and analysis. Create important graphs in Tableau and know which chart to use. Utilize concepts of design in data visualization and storytelling. Storyboard your story for your message based on your audience. Direct your audience's attention to the most important parts of your data story. Design effective business presentations to showcase your data story with Tableau. **Who Should Take This Course:** Analysts sharing the results of their data discovery or analysis. Students communicating data for reports or presentations. Teachers helping learners of any age to cultivate visual data literacy. Executives and business managers reporting data-driven results or metrics. Journalists giving data the starring role in their editorials. **Course Requirements:** A willingness to learn how to tell stories through data.
