Hi All,

I am facing an issue in GNS3 while emulating IPS.I am able to access the CLI as well as IDM
but unable to enable any signature which is disable by default.
Whenever i am trying to enable the signature it stuck on a window displaying " Communicating
with Sensor ". I have been through from some threads which suggest that it will take some time
due to slow emulation of Qemu. I tried all the possibility from my side but unable to resolve this
issue.

Can any one suggest any solution.

Regards,

Bikas Pandey

           Hi Bikas
[ıⅈⅈⅈⅈ]   I am afraid you will have to provide more information in order for
Pantelis   people to be able to assist with your question. For example what
           are the current Qemu options set?Which version of GNS3? Could
           you please post the relevant configuration (I assuming that you
           have already added the monitoring host, such as IDS Security
           Monitor, to the allowed hosts list, otherwise they will not be able to
           communicate with the sensor).
