**Development Expectations of Caribbean Regionalism** Myrtle Chuck-A-Sang,2023-03-16 Foci of publications This publication is intended to be an invaluable tool to the avid researcher on Caribbean regionalism and related subjects The range of papers presented probe areas such as the institutional development of one of the most enduring economic integration systems in the international community the workings of its major institutions and indeed its very survival The importance of record keeping to the survival of any institution or major grouping is the message that permeates this volume given its role in enabling an understanding of our past and in the holistic development and preservation of the region's cultural identity

[Re-mapping the Americas](#) W. Andy Knight,Julian Castro-Rea,Hamid Ghany,2016-04-01 Since the end of the Second World War the map of the Americas has changed dramatically Not only were many former European colonies turned into sovereign states there was also an ongoing process of region making recognizable throughout the hemisphere and obvious through the establishment of several regional agreements The emergence of political and economic regional integration blocs is a very timely topic analyzed by scholars in many disciplines worldwide This book looks at remapping the recent trends in region making throughout the Americas in a way that hasn't been at the center of academic analyses so far While examining these regionalisation tendencies with a historical background in mind the authors also answer fundamental questions such as What influences does globalization have on region making both on normative regionalism plans as well as on actual economic political cultural military and social regionalization processes driven by state and non state actors What ideas or interests lead states in the Americas to cooperate or compete with one another and how is this power distributed How do these regional agreements affect trade relations and have there been trade barriers set up to protect national economies What agreements exist or have existed and how did they change with regard to contents and for what reason The book informs academic as well as non academic audiences about regional developments in the Americas in particular those dating back to the last twenty years Beyond the primary purpose of summarizing the hemisphere's recent trends the book also brings clarification in a detailed but easy to understand way about timely issues regarding the institutionalisation or lack

thereof of the plethora of regional and sub regional bodies that have emerged in this hemisphere over the past couple of decades *Comparative Regionalisms for Development in the 21st Century* Timothy M. Shaw,2016-05-23 The global financial crisis at the turn of the decade has accelerated changes in the relative standing of major regions As both the US and Eurozone economies have confronted a series of setbacks and struggles to find their second breath so Asia Latin America and even Africa have picked up the slack and have been able to maintain high levels of growth The resilience of the Global South questions whether we are witnessing an evolution towards a regional rebalancing or even global restructuring This responding volume has four interrelated topics It explores the transformation taking place in with regard to the financing of development in the Global South and the apparition of new players in the field The emergence of New Regionalisms in the South and the usefulness of these experiences for comparative studies of regional relationship is explicated It turns its attention to new forms of transnational governance that are emerging and the role that a novelty of actors play in this new multilateralism Finally it looks into the implications of this trio of novel directions and players for analyses and policies
