**Caritas Coaching** Sara Horton- Deutsch,Jan Anderson,2018-03-15 Historically nurses have been the source of heart and healing in the healthcare system But today s care providers have little opportunity to make sense of their own experiences md let alone be fully present for others Nurses and other care providers are often ill prepared for the heavy toll of their day to day workload and find themselves at a crossroads accept things the way they are or search for a different way Through stories of caring moments transpersonal journeys and ongoing evolution Caritas Coaching provides nurses and other caregivers a deep intimate look at how to integrate Caring Science into their practice Caring Science offers a scientific and philosophical context to explore describe and research human healing ultimately providing a path for bringing care back into healthcare By integrating Caring Science into their practice nurses can balance information and technology with the human side of healthcare *Healing Through Communication* Carol Leppanen Montgomery,1993-05-05 Advancing caring as an intrinsic part of nursing the author of this volume offers a theory of caring that is grounded in both clinical practice and existing theory Author Carol Leppanen Montgomery describes the qualities and behavioral manifestations the caregiver needs to communicate caring and the unique qualities of the health care system that shape the communication of caring She then lauds transformative effects of caring while admitting the emotional risks caregivers undertake Finally a model is presented that describes the support necessary to sustain this level of communication and to help caregivers cope with the emotional demands of caring Demonstrating the depth and complexity of caring communication Healing Through Communication is a valuable resource for caregivers in all the helping disciplines especially nursing allied health and social work This is an exceptional piece of writing I thoroughly enjoyed reading it and heartily recommend it Is a book on this topic

needed. Absolutely. Too often we make assumptions about the nature of caring how it is learned expressed or enhanced. The placement of caring within a framework of relational communications is an extremely helpful way to visualize teach and support this phenomenon. The strengths of this text are many but briefly I most appreciate the conceptual focus and placing of caring as a tangible describable communications phenomenon the comprehensive treatment of the subject and the many detailed exemplars of caring from a variety of caregiver roles and settings. Mary Aukerman Ph D R N Director of Nursing Education and Research Shadyside Hospital Pittsburgh Pennsylvania Healing Through Communication takes the concept of practice to a deeper level of understanding experiencing and living. The unique focus of this work is the way Dr. Montgomery places the caring healing relationship as central to nursing education and practice. Jean Watson Ph D R N F A A N University of Colorado Health Sciences Center. This fine qualitative research report presents information about an essential topic of interest to educators, academicians and clinicians working in the helping professions. The information presented would also be useful in assisting lay or volunteer helpers work with persons in need. The book is an important work and adds significantly to the knowledge of caring. I believe that this is a benchmark effort. Sylvia A. McSkimming Ph D R N Associate Director of Nursing Research and Education St. Vincent Hospital Medical Center Portland Oregon.
