*Carleton Watkins* Tyler Green, 2018-10-16 A fascinating and indispensable book Christopher Knight Los Angeles Times Best Books of 2018 The Guardian Gold Medal for Contribution to Publishing 2019 California Book Awards Carleton Watkins 1829-1916 is widely considered the greatest American photographer of the nineteenth century and arguably the most influential artist of his era He is best known for his pictures of Yosemite Valley and the nearby Mariposa Grove of giant sequoias Watkins made his first trip to Yosemite Valley and Mariposa Grove in 1861 just as the Civil War was beginning His photographs of Yosemite were exhibited in New York for the first time in 1862 as news of the Union's disastrous defeat at

Fredericksburg was landing in newspapers and while the Matthew Brady Studio's horrific photographs of Antietam were on view Watkins's work tied the West to Northern cultural traditions and played a key role in pledging the once wavering West to Union. Motivated by Watkins's pictures Congress would pass legislation signed by Abraham Lincoln that preserved Yosemite as the prototypical national park, the first such act of landscape preservation in the world. Carleton Watkins' *Making the West American* includes the first history of the birth of the national park concept since pioneering environmental historian Hans Huth's landmark 1948 *Yosemite: The Story of an Idea*. Watkins's photographs helped shape America's idea of the West and helped make the West a full participant in the nation. His pictures of California, Oregon, and Nevada, as well as modern-day Washington, Utah, and Arizona, not only introduced entire landscapes to America but were important to the development of American business, finance, agriculture, government policy, and science. Watkins's clients, customers, and friends were a veritable who's who of America's Gilded Age, and his connections with notable figures such as Collis P. Huntington, John and Jessie Benton Fremont, Eadweard Muybridge, Frederick Billings, John Muir, Albert Bierstadt, and Asa Gray reveal how the Gilded Age helped make today's America. Drawing on recent scholarship and fresh archival discoveries, Tyler Green reveals how an artist didn't just reflect his time but acted as an agent of influence. This telling of Watkins's story will fascinate anyone interested in American history, the West, and how art and artists impacted the development of American ideas, industry, landscape conservation, and politics.

Neither denouncing nor lionizing nor dismissing its subjects, it demonstrates the benefits of taking art consumers seriously as active contributors to the cultural meanings of artwork. It explores the critical role of art patronage in the articulation of a new and distinctly modern elite class identity for newly ascendant corporate executives and financiers. These economic elites also sought to legitimate trends in industrial capitalism such as mechanization, incorporation, and proletarianization through their consumption of a diverse array of elite culture, including regional landscapes, panoramic and stop-motion photography, history paintings of the California Gold Rush, the architecture of Stanford University, and the

design of domestic galleries This book addresses not only readers in the art history and visual and material cultures of the United States but also scholars of patronage studies American Studies and the sociology of culture It tells a story still relevant to this new Gilded Age of the early 21st century in which wealthy collectors dramatically shape contemporary art markets and institutions **Carleton Watkins, William Henry Jackson, and the Notion of the Wilderness Park**
