Depolarizing Food and Agriculture Andrew Barkley, Paul W. Barkley, 2014-10-10 Many issues in food and agriculture are portrayed as increasingly polarized. These include industrial vs sustainable agriculture, conventional vs organic production methods and global vs local food sourcing to name only three. This book addresses the origins, validity, consequences and potential resolution of these and other divergences. Political and legal actions have resulted in significant monetary and psycho social costs for groups on both sides of these divides. Rhetoric on many issues has caused misinformation and confusion among consumers who are unsure about the impact of their food choices on nutrition, health, the environment, animal welfare and hunger. In some cases distrust has intensified to embitterment on both sides of many issues and even to violence. The book uses economic principles to help readers better understand the divisiveness that prevails in the agricultural production, food processing and food retailing industries. The authors propose solutions to promote resolution and depolarization between advocates with seemingly irreconcilable differences. A multifaceted, diverse but targeted approach to food production and consumption is suggested to promote social well being and reduce or eliminate misinformation, anxiety, transaction costs and hunger.

toward overall success The author s integrated measures of success can be used to communicate organizational progress to stakeholders shareholders boards of trustees corporate leaders the workforce and the customer base and thereby galvanize broad commitment to organizational success Klubbeck shows how his principles and methods of measuring overall success can be applied at all levels individual team group department division and organization What You Will Learn Understand why you should measure success instead of performance Understand what to measure and what not to measure Integrate the measures of success to tell a complete story Share measures of success with different audiences Who This Book Is For Organizational leaders at all levels from the executive suite to middle management analysts and consultants who are tasked with designing metrics programs for organizations individuals interested in adapting the author s framework to measure overall personal success in multiple dimensions **The New Brewer** ,2005 **Night Club & Bar** ,2007 **Marketing**
