Help You Conquer GMAT Math GAME PLAN FOR GMAT MATH will help readers develop the skills and mindset needed to score high on the quantitative section of the GMAT exam. This book contains the excerpted math sections as taken from the ebook parent paperback titled Game Plan for the GMAT Your Proven Guidebook for Mastering the GMAT Exam in 40 Short Days. Whether you're a candidate already enrolled in a test prep course or are undertaking self study this book will serve as a rigorous skill building study guide to help you conquer the quantitative section of the GMAT exam. Studying for the math section of the GMAT exam requires some 50 hours of study time. This book's content is conveniently divided into topics which require two to three hours of study time per day. Total study time will vary between 40 to 60 hours for the entire 20 days. Track your progress using a specially designed 20 day checklist. Take ownership of your exam and gain the confidence you need by building real skills. Learn to identify the different types of math problems and the math concepts being tested. Understand how to set up algebraic word problems, how to choose the correct formula for probability problems and how to pick the right numbers for number property problems. Succeed by knowing what makes each problem tick and how to break them down analytically. Secret Recipe: Each hand selected problem comes with a classification snapshot and chili rating. Classification serves to identify each problem according to category or sub category. Snapshot highlights why that particular problem was chosen including the underlying problem solving principle or strategic approach. Chili rating helps candidates gauge the estimated difficulty level of a given problem. A single chili indicates that the estimated difficulty level of a given problem is mild (500 to 590). Difficulty level two chilies spell hot (600 to 690). Difficulty level and three chilies signal very hot (700 or above). Difficulty level By practicing with problems of varying levels of difficulty candidates will learn to maintain discipline when solving easy but tricky problems and also to exercise flexibility when tackling harder problems. These latter problems require that a test taker choose the best approach and look for time saving shortcuts. Author's bio: Brandon Royal CPA MBA is a former Kaplan GMAT instructor, veteran MBA admissions coach and graduate of the University of Chicago's Booth School of Business. This book represents his distilled experience gained from classroom teaching on two continents and individual tutor sessions that have helped hundreds of applicants beat the GMAT and achieve acceptance at the world's leading business schools. This author's approach enabled me to increase my score from 650 to 730. The book's unique way of categorizing each type of question giving insightful tips to master these problems as well as the detailed analysis for each set of problems were key factors in my cracking the test. Moreover I found in his materials problems that I did not find anywhere else and which were critical on the D day when answering a few extra questions right made the difference between a good score and an excellent one.
