China's New Sources of Economic Growth: Vol. 1

Ligang Song,Ross Garnaut,Cai Fang,Lauren Johnston,2016-07-21 China s change to a new model of growth now called the new normal was always going to be hard Events over the past year show how hard it is The attempts to moderate the extremes of high investment and low consumption the correction of overcapacity in the heavy industries that were the mainstays of the old model of growth the hauling in of the immense debt hangover from the fiscal and monetary expansion that pulled China out of the Great Crash of 2008 would all have been hard at any time They are harder when changes in economic policy and structure coincide with stagnation in global trade and rising protectionist sentiment in developed countries extraordinarily rapid demographic change and recognition of the urgency of easing the environmental damage from the old model China s economy has slowed and there are worries that the authorities will not be able to contain the slowdown within preferred limits This year s Update explores the challenge of the slowdown in growth and the change in economic structure Leading experts on China s economy and environment review change within China s new model of growth and its interaction with ageing environmental pressure new patterns of urbanisation and debt problems at different levels of government It illuminates some new developments in China s economy including the transformational potential of internet banking and the dynamics of financial market instability China s economic development since 1978 is full of exciting change and this year s China Update is again the way to know it as it is happening

China: Regaining Growth Momentum after the Pandemic

Ligang Song,Yixiao Zhou,2024-12-13 The slower growth of the Chinese economy in the aftermath of the pandemic has prompted the Chinese Government to adopt measures to boost domestic consumption and deepen structural reform with

the effectiveness of such policies beginning to be felt. However, China still faces challenges that will affect its growth dynamics down the track. These include the slowdown of its real estate sector, the complex internal and external environments for macroeconomic policy, the high level of income inequality, weak growth in investment by the private sector, negative population growth, high levels of debt, deglobalisation, weakness in the financial sector and equity markets, the inadequacy of its fiscal system, and the imperative to decarbonise the economy. China must confront these challenges to maintain growth momentum and achieve higher levels of income and living standards. The theme of the 2024 China Update book is China Regaining Growth Momentum after the Pandemic. It discusses some of the challenges and policy issues that are being watched with keen interest by decision makers and markets alike, including: What are the obstacles to economic growth in the aftermath of the pandemic and how can these be overcome? What are the key challenges and opportunities for China to move to the next level of development against the backdrop of negative population growth? Is it time for a Tax Sharing System Reform 2.0 to consolidate China's fiscal position? What are the challenges facing China's small and medium enterprises? How is China's business environment faring and what are the implications for investment? How does China's urban housing affordability impact its low fertility rate? How will the trade conflict between China and the United States play out regarding semiconductors and other high tech products? How does China Africa bilateral agricultural trade impact on African rural transformation?

China's Economic Growth Prospects Cai Fang, 2016-01-29. China has grown rapidly since the reform initiation of the 1970s. China's Economic Growth Prospects narrates the contribution of demographic transition to recent economic growth in China and provides suggestions for ways in which it can sustain growth over the next few decades. The expert author provides reasons for the economic slowdown since the second decade of the twenty first century, explores the challenges facing China's long term sustainability of growth with the disappearance of demographic dividend and proposes policy suggestions. He concludes that in order to avoid the middle income trap, economic growth in China must transform from an inputs driven pattern to a productivity driven pattern. Academics, researchers and students of economics and business, particularly those specialising in China, will find this book to be a useful resource. Investment bankers, journalists, politicians and policy makers will find the discussions of past experience and the future potential of the Chinese economy to be of interest.

The Great Energy Transformation in China Ligang Song, Yixiao Zhou, 2025-11-25. In 2020, China started the drive to commence a reduction in carbon emissions by 2030 and reach carbon neutrality by 2060, setting in motion a transition to a green, sustainable and clean economy. China has ambitiously developed clean energy alternatives to coal. This transformation encompasses multifaceted strategies ranging from investment in renewable energy and the development of low emission technologies to more stringent policy regulations on emissions. Renewable energy sources like hydroelectric power, wind, solar and biomass have received substantial attention and investment, with China emerging as a global leader in renewable energy capacity. In the technology space, China's transitioning to electric vehicles (EVs) has catalysed the

development of a robust EV market fostering innovation in battery technology and charging infrastructure China has now become the largest exporter of EVs in the world market These developments have the potential to materially help curb the world's carbon footprint and mitigate environmental degradation Nevertheless challenges persist domestically including the need for grid modernisation to accommodate intermittent renewable energy sources and addressing the socio economic impacts on coal dependent regions In the international market China's efforts towards a cleaner and more sustainable energy landscape have helped position it as a leader in sustainable economic development This could enhance trade of green products the development of global renewable energy and international investments in energy transformation However global trade and investment in green technologies and products are faced with rising geopolitical tensions and trade protectionism This book discusses China's achievements in its transition towards renewable energies and identifies new opportunities and challenges for deepening energy transformation in China **China in Transition** Bettina Born,1995

China and Post-Socialist Development Bolesta, Andrzej,2014-11-19 The re emergence of China as an economic superpower during its systemic transition is an astonishing phenomenon China and Post Socialist Development is the first comprehensive attempt to frame China's advancements within the context of the East Asian developmental miracle against the background of post socialist transformation asking how has it happened and where does China go from here In this book the author argues that as China transits from central planning to market it tries to imitate the institutions and policies of Japan and South Korea during their high growth periods of the second half of the twentieth century China's approach broadly in opposition to the neo liberal doctrine has brought impressive results leading the author to make important predictions about the future This book is for everybody who is interested in China development and post socialist transformation

Veranstaltung America s Pacific Century Sprache Deutsch Abstract Not only by virtue of its size China is generally considered to gain even more economical weight in the future As such it has the potential to shape business relations

worldwide With regard to the global economic interdependence it is worthwhile to ask How will China's transformation towards an innovation based economy influence the China policy of the United States of America USA **Deepening Reform for China's Long-term Growth and Development** Ligang Song, Ross Garnaut, Cai Fang, 2014-07-10 The Chinese economy has entered a new phase of development in which sources of growth are not so much dependent upon pure increases in labour investment and credit expansion but from productivity improvement structural changes technological progress and the benefits from improvement of the social security and welfare improvement When market functions are fully established to become a main channel for allocating resources the entrepreneurship will flourish engaging in more innovative activities workers will move more freely and have more incentives to improve their skills firms will become more productive through market entry and exit the economic structure will become more balanced because of the improved resource allocation and in the end growth will become more spontaneous and sustainable In this sense reforms could deliver dividend by raising China's potential economic growth rates For China to confront all the challenges it faces at present the reforms undertaken now have to be deep comprehensive and far reaching in order to succeed in paving the way for China to complete the task of transformation in the long term There is no better alternative than deepening the market oriented reform in advancing the course of China's modernisation for future development and prosperity and lifting China to the status of a developed economy in the next two decades The recent China update books have covered the topic of reform from different angles and this new book is another attempt to address this important issue [China - the New Developmental State?](#) Nicola Meier, 2009-01-01 The central focus of this analysis is whether the economic growth of China can be attributed to an emulation of the development models of Japan South Korea and Taiwan Based on the developmental state theory an East Asian developmental state model is set up as a benchmark The thesis uses an empirical analysis of the auto industry to highlight the performance outcome of China's development strategy The author confirms that China has evolved into a developmental state similar in its core characteristics to the three leading East Asian states The model of development in China however is an innovative combination of factors from the developmental states the legacies of the past command economy as well as of the adopted market economy mechanism including international capital flows **Chinese Economic Development** Yinxing Hong, Ninghua Sun, 2021-07-08 The book provides a meticulous analysis of economic development and concomitant problems in China since the late 1970s and advances suggestions on further economic modernisation and transition from both theoretical and practical angles Based on theories from development economics and solid empirical studies the authors two renowned Chinese economists provide a perceptive analysis of the Chinese development model in the post Mao era They shed light on questions that have perplexed many How can China sustain the rapid growth of the past 40 years Is there a unique China path to economic progress They argue compellingly that China's development model has to switch from a manufacturing driven one to a brand new approach centring on scientific and technical innovation and the

integration of its existing economic structure into an increasingly complex global economy Such transformation will help overcome the middle income trap while addressing other institutional and economic challenges The book will appeal to students scholars and policymakers interested in the Chinese and global economies as well as transnational studies in the post COVID 19 world General readers willing to obtain a grasp of Chinese economic development from the insider s perspective will also find it useful *China's New Sources of Economic Growth* Ligang Song,Ross Garnaut,Fang Cai,Lauren Johnston,2017-07-20 China s efforts in searching for new sources of growth are increasingly pressing given the persistence of the growth slowdown in recent years This year s book elucidates key present macroeconomic challenges facing China s economy in 2017 and the impacts and readiness of human capital innovation and technological change in affecting the development of China s economy The book explores the development of human capital as the foundations of China s push into more advanced growth frontiers It also explores the progress of productivity improvement in becoming the primary mechanism by which China can sustain economic growth and explains the importance of China s human capital investments to success on this front The book demonstrates that technical change is a major contributor to productivity growth and that invention and innovation are increasingly driving technical change but so far lumpily across regions sectors and invention motivations Included are chapters providing an update on reform and macroeconomic development educational inequality the role of intangibles in determining China s economic growth and China s progress in transitioning towards being an innovative country The book also covers the regional dimension of innovation and technological progress by sector in agricultural productivity renewable energy and financial markets Chapters on trade investment regional cooperation and foreign aid explore further the mechanisms through which technological change and innovative activities are emerging locally and internationally **China's New Sources of Economic Growth** Ross Garnaut,Lauren Johnston,2018-02 China s change to a new model of growth now called the new normal was always going to be hard Events over the past year show how hard it is The attempts to moderate the extremes of high investment and low consumption the correction of overcapacity in the heavy industries that were the mainstays of the old model of growth the hauling in of the immense debt hangover from the fiscal and monetary expansion that pulled China out of the Great Crash of 2008 would all have been hard at any time They are harder when changes in economic policy and structure coincide with stagnation in global trade and rising protectionist sentiment in developed countries extraordinarily rapid demographic change and recognition of the urgency of easing the environmental damage from the old model China s economy has slowed and there are worries that the authorities will not be able to contain the slowdown within preferred limits This year s Update explores the challenge of the slowdown in growth and the change in economic structure Leading experts on China s economy and environment review change within China s new model of growth and its interaction with ageing environmental pressure new patterns of urbanisation and debt problems at different levels of government It illuminates some new developments in China s economy including the

transformational potential of internet banking and the dynamics of financial market instability China's economic development since 1978 is full of exciting change and this year's China Update is again the way to know it as it is happening **China**

Society Bulletin China Society of America, New York, 1919 **Transition and Development in China** Mr Yun

Chen, 2012-11-28 China's transition from a planned economy to a market economy has succeeded in producing more than a decade of phenomenal growth Whilst similar reforms in countries of Central and Eastern Europe and the former Soviet Union have seen an initial downturn in production usually with a significant rise in unemployment the success of the approach taken by China has been remarkable However China embarked upon the process without a well designed blueprint at the outset The resulting piecemeal partial incremental and often experimental approach has proved complicated to implement requiring a complex melding of politics and economics internal and foreign affairs government and market How the difficult task of balancing the diverse array of often competing concerns has been achieved is the subject of this book which examines the dismantling of the centrally planned system and the mechanism of institutional change in Chinese transition
