Colin Campbell, Howard Jacobson, 2014-02-25 By now the low carb diet's refrain is a familiar one Bread is bad for you Fat doesn't matter Carbs are the real reason you can't lose weight The low carb universe Dr Atkins brought into being continues to expand Low carb diets from South Beach to the Zone and beyond are still the go to method for weight loss for millions These diets' marketing may differ but they all share two crucial components the condemnation of carbs and an emphasis on meat and fat for calories Even the latest diet trend the Paleo diet is despite its increased focus on some whole foods just another variation on the same carbohydrate fears In *The Low Carb Fraud* longtime leader in the nutritional science field T. Colin Campbell author of *The China Study* and *Whole* outlines where and how the low carb proponents get it wrong where the belief that carbohydrates are bad came from and why it persists despite all the evidence to the contrary The foods we misleadingly refer to as carbs aren't all created equal and treating them that way has major consequences for our nutritional

well being If you re considering a low carb diet read this e book first It will change the way you think about what you eat and how you should be eating to lose weight and optimize your health now and for the long term *Whole T. Colin*

Campbell,Howard Jacobson,2013-05-07 New York Times Bestseller What happens when you eat an apple The answer is vastly more complex than you imagine Every apple contains thousands of antioxidants whose names beyond a few like vitamin C are unfamiliar to us and each of these powerful chemicals has the potential to play an important role in supporting our health They impact thousands upon thousands of metabolic reactions inside the human body But calculating the specific influence of each of these chemicals isn t nearly sufficient to explain the effect of the apple as a whole Because almost every chemical can affect every other chemical there is an almost infinite number of possible biological consequences And that s just from an apple Nutritional science long stuck in a reductionist mindset is at the cusp of a revolution The traditional gold standard of nutrition research has been to study one chemical at a time in an attempt to determine its particular impact on the human body These sorts of studies are helpful to food companies trying to prove there is a chemical in milk or pre packaged dinners that is good for us but they provide little insight into the complexity of what actually happens in our bodies or how those chemicals contribute to our health In The China Study T Colin Campbell alongside his son Thomas M Campbell revolutionized the way we think about our food with the evidence that a whole food plant based diet is the healthiest way to eat Now in *Whole* he explains the science behind that evidence the ways our current scientific paradigm ignores the fascinating complexity of the human body and why if we have such overwhelming evidence that everything we think we know about nutrition is wrong our eating habits haven t changed *Whole* is an eye opening paradigm changing journey through cutting edge thinking on nutrition a scientific tour de force with powerful implications for our health and for our world *BenBella's Best of Plant-Based Eating* Benbella Vegan,2015-10-27 Living plant based doesn t mean you have to resign yourself to eating salads for every meal although we wouldn t say no to a bowl of leafy greens BenBella s Best of Plant Based Eating which has been downloaded over 125 000 times includes creative and delicious recipes for a well balanced varied and satisfying vegan lifestyle Inside this second edition you ll find nearly 50 recipes including 14 brand new dishes from our top selling cookbooks including Thai Tacos Savory Chickpea Omelets Buddha Lentil Burger Raspberry and Coconut Glazed Doughnuts And more
