Performed Culture in Chinese Language Education Guangyan Chen, 2020-06-22 Performed Culture in Chinese Language Education A Culture-Based Approach for U.S. Collegiate Contexts elaborates on a cultural awareness-oriented cultural performance-based and cross-cultural communication focused foreign language pedagogical paradigm. Performed Culture Approach in the context of U.S. collegiate Chinese language education. Guangyan Chen draws on the data collected through questionnaires, comparisons between this pedagogy and mainstream pedagogical frameworks, and analyses of curricular development lesson plans and classroom discourses. Chen promotes the performed culture approach by delineating the theoretical framework of this pedagogy, reporting studies that empirically support cultural primacy in Chinese language education, and illustrating this pedagogy through analyses of a curricular structure, a lesson plan, and classroom discourses. Chen shows how this pedagogy addresses the gaps between the social need for global citizens and the insufficient integration of culture into foreign language education. The performed culture approach also addresses the overall drop in U.S. collegiate foreign language enrollment as this pedagogy connects foreign language programs to university missions and social needs

Chinese Language and Culture Education Chunyan Zhang, 2024-04-02 Against the background of the Australian government's strategic plan to promote Asian languages in schools, this book is an innovative autoethnographic inquiry into what actually occurs in the implementation of a Chinese language and culture program in an Australian context. Drawing on eight years of socio cultural and educational fieldwork in a primary school, Chunyan Zhang examines complex fluid and heterogeneous daily teaching practices and the ways in which ideas of China are assembled, presented and performed. She asks the following questions: What is China? Where does Taiwan fit into the China depicted in a multicultural, globalised classroom? Can Chinese communism or Chairman Mao be avoided in teaching English speaking learners? What kind of China is brought in here while what kind of China is being silenced and othered? Through the partial connection between method assemblage and Daoist concepts, Zhang develops a water like pedagogy in teaching. She uses the knowledge flow model to examine the imbalanced knowledge flow within teacher student interactions. From finding China as a hybrid assemblage to proposing China as method, Zhang's investigation makes an important contribution to the sociology of Chinese language education. This book is an essential and rich content resource for primary and secondary teacher education and research teacher candidates and educators in Chinese as a second language education.

Warp and Weft Keekok Lee, 2017-10-23 This book attempts to deconstruct certain key clusters of Chinese characters and words, centring on themes such as war and peace, kith and kin, male and female, rites and rituals, pleasure and leisure, to make them yield fascinating tales about Chinese culture and history in which these words are embedded and which they at the same time encapsulate. The Chinese language, Chinese history and culture are presented as one long woven bolt of silk for which China has historically been noted: with the written language conceived as the warp while the history and culture the weft. In this process of linguistic exploration, the book shows in what ways the Chinese written language may be said to be unique as well as to
