Care for a Pet Chinchilla Amie Jane Leavitt,2019-12-05 If you're thinking about getting a pet but don't want a traditional animal like a cat or dog you might want to consider getting a pet chinchilla. One of the best things about this pet is that it's so soft. In fact, it has the softest fur in the world. Chinchillas are unique in other ways too. They are from a very dry and dusty place that has very little water. So to clean themselves, they roll around in special volcanic dust. Chinchillas aren't all fun and games though. As with any other pet, you need to feed your chinchilla the right foods, clean its cage, and spend time playing with it. Are you convinced you'd like one of these animals as your pet? If so, read on to find out how you can convince your parents too.

Chinchillas Donna Anastasi,2011-11-08 The delightful South American unrodent like rodent known as the chinchilla makes a playful and affectionate companion animal. Author Donna Anastasi refers to them as inquisitive, sensitive, intelligent, and active, the ideal combination of intelligence and interaction anyone would want in a small pet. This Complete Care Made Easy title is an ideal introductory pet guide about the chinchilla, with detailed chapters on characteristics, selection of a healthy chinchilla, housing and care, welcoming and taming the new arrival, feeding and daily care, training and health, and veterinary care. The book offers excellent advice about feeding and nutrition, including the choice of pellets, supplements, hay, and treats. The chapter Understanding and Training Your Chinchilla explains the abilities and limitations of chinchillas' senses; they're nearsighted but have exceptional hearing and offers a great overview of how they communicate through sounds and body language. With positive reinforcement and a clicker, no leash and collar, the chin can be trained to perform tricks for the family's entertainment, and the book gives lots of training pointers for owners. For chin fanciers who are interested in further exploration, the author includes chapters on breeding chinchillas and getting involved in chin shows. Sidebars throughout the text provide useful information to chinchilla keepers, covering such topics as chin colors, harmful human foods, daily care checklist, and show terminology. The resources include chinchilla societies, books, and websites. Glossary of terms and index included.

Chinchillas Tom Handford,2010 Discusses what is needed to keep chinchillas as pets, covering such topics as physical characteristics, housing, diet, behavior, and health issues.

all their fur or complete with feathers but the chinchilla kit is one of the few animals that is born with its eyes wide open Even puppies are born with their eyes closed Chinchillas cannot get their fur wet so instead of bathing in water chinchillas use volcanic ash to clean their fur This ash is found in the mountains where chinchillas live in the wild When chinchillas are kept as pets the chinchillas owner must purchase ash for the chinchilla to bathe in several times a week Chinchillas have very special little hands that can grab and hold items in much the same way that a human grabs and holds items Chinchillas are highly unique because they are one of the few species in the wild that are monogamous This means that they choose a partner and keep that same partner for life While all chinchillas are small in size especially compared to more common mammals like dogs and cats the chinchilla's body size is interesting because unlike most other mammal groups the chinchilla females are usually a bit larger than the males This is seen more often in spiders and even birds but very rarely in mammals Most wild chinchillas are grey or brown in color while domestic pet chinchillas are the more colorful with white beige and violet being common Wild chinchillas in the Andes mountains rarely actually drink water because they eat a lot of fruits and succulent plants Succulent plants are plants in the cactus family that hold a lot of water in them The water inside the fruits and plants that the chinchilla eats gives them most of the water they need to live
