After nine years into the future since 2015 most nations still need to gear up to their full potential to fulfill the targeted development. Although the United Nations has been publishing its annual SGD progress reports since 2016 along with a list of portals where the parameters can be measured for individual nations for each one of the seventeen goals the perspective of researchers and practitioners provides a unique perspective on the progression. Despite the rigorous attempts from the United Nations regulatory authorities and government initiatives the gap remains and the fulfillment of the targets for all seventeen goals till the end of 2023 remains uncertain. The book Sustainable Development Goals A Handbook Based on Media Perspective offers a collection of concepts and perspectives on areas like effective administration, media advocacy, digital literacy, responsible usage, integrating inventory management, greening efforts, digital citizenship, revival of tribal culture, green products, sustainable urbanization, pastors as social media influencers for sustainable development, agrarian sustainability programs on sustainability influencers of sustainability, social media activism, women's health representation, empowerment, sustainability in films and entertainment, sustainable living, mindful consumption, climate advocacy, public awareness, waste management, sustainable communication, green practices, environment friendly technology, multiculturalism, environmental communication, democratic governance, health communication, and many more.
