New technologies make possible new kinds of language teaching and language becomes an economic commodity with a value in the global marketplace. This has implications for how and why people learn languages and for which languages they learn. Drawing together the various strands of the globalization debate this rich and varied collection of contributions explores issues such as The commodification of language and language skills. The use of new media and new technologies in language learning and teaching. The effects of globalization on the language teaching industry. New forms of power and resistance. **Globalization of Language and Culture in Asia** Viniti Vaish, 2010-01-01 An exploration of the impact of globalization on diverse cultures and how this effects the dominant languages across Asian civilisations.

Cultural Learning Styles in Language Education Lynne N. Li, 2022-05-25 This book presents a nuanced look at the relationship between language learning styles and culture to illuminate how these important constructs are understood, employed and play out in the real world. Through the lens of different learning style dimensions cognitive, affective, process centred, environment centred and cultural, Li unpacks and examines the commonly accepted tensions between learning styles, culture, teacher assumptions and teaching approaches. With a focus on Asian learning styles and Chinese learners, Li addresses the past and current debates and reconceptualises the roles and tensions between students, learning, students' cultural backgrounds and teaching styles. Li adeptly navigates this controversial arena to demystify preconceptions and provide avenues for innovative and effective classroom practices in language teaching. Ideal for pre-service ESL/EFL teachers, researchers and scholars, this book bridges the gap between research and practice on culture and language learning in the classroom.

Association of America , Global Language Policies and Local Educational Practices and Cultures Shirley O'Neill,Henriette van Rensburg,2016-03-05 To say that the world is getting smaller and smaller may well be a truism but evidence of this can be experienced every day not only at international conferences but in the familiar spaces of our everyday lives Globalisation as a phenomenon is not new we only need to look at Greek and Roman histories for examples of the ways in which cultures and languages have the capacity to spread across vast areas though similar examples can be found across the world More recently other empires grew many spreading from Europe to colonise and influence peoples with their own rich histories Such global developments brought with them benefits for some and problems for others and such a pattern of benefits and problems has continued in more recent manifestations of globalisation characterised by speed and extent of movement and interpreted in different ways according to where the locus of power is situated Many find themselves caught up in the maelstrom that globalisation inevitably produces especially when it is caught up with international political and global developments The concept of migratory movements as a characteristic of globalisation conjures up both hope and despair depending on the reasons people have for moving and the possibility or impossibility of having a choice in whether they move or not Opportunities to gain other languages as a plurilingual individual or a multilingual community need also to be considered in the face of potential language loss or even language death where particular languages are preceived as having

low status and little value Global shifts have an enormous impact on local practices and cultures and they bring with them significant implications for the development of language practices and policies In order to stay afloat when confronted by ongoing rapid and complex changes not only in available knowledge but also in communities cultures circumstances needs challenges and opportunities new approaches to education including curricula and pedagogies need to be imagined and developed In this book such educational pedagogical and policy imperatives are framed within the context of a deep approach and explored specifically through its implications for language education
