## **Spotlight STEM For Kids:**

*Teaching Computational Thinking and Coding to Young Children* Bers, Marina, 2021-06-25 Computational thinking is a lifelong skill important for succeeding in careers and life. Students especially need to acquire this skill while in school as it can assist with solving a number of complex problems that arise later in life. Therefore the importance of teaching computational thinking and coding in early education is paramount for fostering problem solving and creativity. *Teaching Computational Thinking and Coding to Young Children* discusses the importance of teaching computational thinking and coding in early education. The book focuses on interdisciplinary connections between computational thinking and other areas of study, assessment methods for computational thinking and different contexts in which computational thinking plays out. Covering topics such as programming, computational thinking, assessment, computational expression and coding, this book is essential for elementary and middle school teachers, early childhood educators, administrators, instructional designers, curricula developers, educational software developers, researchers, educators, academicians and students in computer science education, computational thinking and early childhood education.

### **Units of Study for Teaching Writing** Lucy

Calkins, 2006 This series of books is designed to help upper elementary teachers teach a rigorous yearlong writing curriculum.

**Technology and Digital Media in the Early Years** Chip Donohue, 2014-08-07 A Co Publication of Routledge and NAEYC *Technology and Digital Media in the Early Years* offers early childhood teacher educators, professional development providers and early childhood educators in pre-service, in-service and continuing education settings a thought provoking guide to effective, appropriate and intentional use of technology with young children. This book provides strategies, theoretical frameworks, links to research evidence, descriptions of best practice and resources to develop essential digital literacy knowledge, skills and experiences for early childhood educators in the digital age. *Technology and Digital Media in the Early Years* puts educators right at the intersections of child development, early learning, developmentally appropriate practice, early childhood teaching practices, children's media, research, teacher education and professional development practices. The book is based on current research, promising programs and practices and a set of best practices for teaching with technology in early childhood education that are based on the NAEYC FRC Position Statement on Technology and Interactive Media and the Fred Rogers Center Framework for Quality in Children's Digital Media. Pedagogical principles, classroom practices and teaching strategies are presented in a practical, straightforward way informed by child development theory, developmentally appropriate practice and research on effective, appropriate and intentional use of technology in early childhood settings. A companion website <http://teccenter.ericson.edu/tech-in-the-early-years/> provides additional resources and links to further illustrate principles and best practices for teaching and learning in the digital age.
