Of Kindness and Kilowatts (Nothing is Promised 3) Susan Kaye Quinn, 2021-04-15 Humanity is trapped in a loop As the world heats it takes more energy to keep humanity from dying a feedback loop that makes net zero carbon

increasingly impossible to reach Akemi's job on the Public Utilities Commission has its own daily disasters making sure the infrastructure of civilization keeps running is the most thankless job on the planet. When a double event hits: heatwave plus viral breakout, keeping the power on is an all-out battle. It doesn't help that he's distracted by his elderly father who was struck down and neuro-compromised by the same virus that killed his mother the year before. Now his father is living in Akemi's attic. They'd never had a relationship before, and that was a fair description of the state of things now. Then an old friend's daughter shows up with a mystery of physics and a tale of stolen kilowatts and deadly intrigue. He would dismiss it outright except she's also the Regional Director of the power grid. Something isn't right, and the Governor won't accept excuses when the power goes out. Sometimes you're the right person in the right place whether you want to be or not. *Of Kindness and Kilowatts* is the third of four tightly connected solarpunk novels in a near-future climate fiction series. It's about our future: how the world is always more complicated than it seems, and how just when it seems like things couldn't possibly get worse, they invariably do. And that's when we discover kindness and quantum entanglement are what hold everything together. If you enjoyed the optimistic climate solutions in Kim Stanley Robinson's *Ministry for the Future* or the cozy cooperative future in Becky Chambers' *Monk and Robot* series, you will enjoy *Nothing is Promised*. Keywords: hopepunk, climate fiction, Japan, Japanese American, Asian American, quantum physics, solarpunk, climate change, climate crisis, solar energy, green energy, clean energy, global warming, pandemic, plague, underwater adventure, kelp farming, fusion engineering, wind energy, literary science fiction, mystery, suspense, hard science fiction, dystopian, heroine's journey.

Offline Brian F. Adams, 2019. Meagan is a seventeen-year-old netaholic addicted to online dating but scared to death to take those online relationships offline. Banished by her parents to her gay hippie grandfather's farm where the cell reception is terrible, she is so not looking forward to a techno-free summer of gardening and cleaning house. When two offline boys fall for her at a Netaholics Anonymous meeting, she desperately enlists her bestie Sheila to help extradite herself from such an awkward situation. Good luck with that! Falling in with a ragtag bunch of Luddites, Meagan joins a zany softball team, takes the game of Scrabble to a whole new level, and gets immersed in the world of invertebrate sex all the while coming to terms with her raging netaholism and discovering the joys and heartbreaks of offline relationships.
