Karafyllis,Gotlind Ulshöfer,2008 The now popular idea that emotions have an intelligent core and the reverse that intelligence has an emotional core comes from the neurosciences and psychology Similarly the fundamental sexualization of the brain the new interest in essential differences in male and female brains and behaviors is based on neuroscience research and neuroimages of emotions In Sexualized Brains scholars from a range of disciplines reflect on the epistemological claims that emotional intelligence EI can be located in the brain and that it is legitimate to attribute distinct kinds of emotions to the biological sexes The brain as an icon has colonized the humanities and social sciences leading to the emergence of such new disciplines as neurosociology neuroeconomics and neurophilosophy Neuroscience and psychology now have the power to transform not only the practice of science but also contemporary society These developments the essays in this volume show will soon affect the very heart of gender studies
