**Design Thinking in Student Affairs** Julia Allworth, Lesley D'Souza, Gavin W. Henning, 2023-07-03 Design thinking is an innovative problem solving framework This introduction is the first book to apply its methodology to student affairs and in doing so points the way to its potentially wider value to higher education as a whole With its focus on empathy which is the need to thoroughly understand users experiences design thinking is user centered similar to how student affairs is student centered Because the focus of design thinking is to design with users not for users it aligns well with student affairs practice In addition its focus on empathy makes design thinking a more equitable approach to problem solving than other methods because all users experiences not just the experiences of majority or average student need to be understood Centering empathy in problem solving processes can be a tool to disrupt higher education systems and practices Design thinking is a framework to foster innovation and by its nature innovation is about responding to change factors with creativity In an organization design thinking is inherently connected to organizational change and culture because the process is really about changing people to help them rally around a disruptive idea Implementing design thinking on a campus may in itself be disruptive and require a change management process The beauty of using design thinking is that it can also act as a framework to support organizational culture change Design thinking approaches with their focus on stakeholder needs as opposed to systemic norms collaborative solutions building and structured empathy activities can offer a concrete tool to disrupt harmful systems of power and oppression Design thinking as a process is not a magic solution to equity problems though it can be a powerful tool to approach the development of solutions that can address inequity Design thinking is data driven and considers both qualitative and quantitative data as necessary to gain most complete picture of an issue and its possible solutions whether a product program or service Design thinking has numerous benefits to afford students affairs Chapter 1 outlines a case for design thinking in student affairs Chapter 2 discusses a brief history of design thinking noting its germination and evolution

to current practice Chapter 3 provides a detailed description of each step of the design thinking model with pertinent examples to make the steps clearer Chapter 4 explains the intersection of equity and design thinking while chapter 5 explores the use of design thinking for organizational change Chapter 6 presents a new model for design thinking assessment Chapter 7 addresses the challenges and limitations of the process Chapter 8 concludes the book by discussing the alignment of design thinking and student affairs and outlining next steps Design thinking is an innovative process that can change the way higher education and student affairs operates realizing the potential it offers Design Strategy Nancy C.
