Cch Japanese Tax Guide:

The Taxation of Corporate Groups Under Consolidation Antony Ting, 2013 Antony Ting presents the first comprehensive comparative study of the tax consolidation regimes adopted in eight countries **Legal Looseleafs in Print**, 2005

Hoover's Handbook of American Business, 1992, 1992 International Taxation of Manufacturing and Distribution

John Abrahamson, 2016-02-18 The most thorough treatment of its subject available this book introduces and analyses the international tax issues relating to international manufacturing and distribution activities extending from the tax regime in the country where the manufacturing activities are located through to regional purchase and sales companies to the taxation of local country sales companies. The analysis includes the domestic tax laws relating to manufacturing and distribution company profits as well as international tax issues relating to income flows and the payment of dividends. Among the topics and issues analysed in depth are the following: foreign tax credits, taxation in the digital economy, tax incentives, intellectual property group, treasury companies, mergers and acquisitions, leasing, derivatives, controlled foreign corporation provisions, VAT and customs tariffs, free trade agreements and customs unions, transfer pricing, role of tax treaties, hedging, related accounting issues, deferred tax assets and liabilities, tax risk management, supply chain management, depreciation allowances and carry forward tax losses. The book includes descriptions of 21 country tax systems and ten detailed case studies applying the analysis to specific examples. Detailed up to date attention is paid to the OECD Action Plan on Base Erosion and Profit Shifting (BEPS) and other measures against tax avoidance. As a full scale commentary and analysis of international taxation issues for multinational manufacturing groups including in depth consideration of corporate structures, tax treaties, transfer pricing and current developments, this book is without peer. It will prove of inestimable value to all accountants, lawyers, economists, financial managers and government officials working in international trade environments. **Taxation in ASEAN and China** Nolan Sharkey, 2012-05-31 China and the ASEAN region have risen rapidly to a position of immense economic significance in the global economy. Academics, policy makers and businesses are all keen to understand more about taxation in China and ASEAN and this work seeks to address this key issue by providing a comprehensive overview of the many often mentioned but little understood challenges of doing business in the region. Traversing a wide range of regional issues and jurisdictions, topics covered include the role of DTAs in regional integration, the impact of social institutions on tax corruption and its causes, economic development and taxation, and the use of education in developing systems. Case studies are taken from countries such as China, Vietnam, Hong Kong, Singapore, the Philippines, Malaysia and Indonesia. Drawing on the results of these discussions, the book also sheds light on the question of whether different taxing institutions are needed in the region. Gathering together a cross disciplinary group of eminent scholars, this work will be of great interest to all students and scholars of Asian economics, Asian finance and taxation in general.
