*Neurological Rehabilitation* Michael P. Barnes,David C. Good,2013-01-10 *Neurological Rehabilitation* is the latest volume in the definitive *Handbook of Clinical Neurology* series. It is the first time that this increasingly important subject has been included in the series and this reflects the growing interest and quality of scientific data on topics around neural recovery and the practical applications of new research. The volume will appeal to clinicians from both neurological and rehabilitation backgrounds and contains topics of interest to all members of the multidisciplinary clinical team as well as the neuroscience community. The volume is divided into five key sections. The first is a summary of current research on neural repair, recovery and plasticity. The authors have kept the topics readable for a non scientific audience and focused on the aspects of basic neuroscience that should be most relevant to clinical practice. The next section covers the basic principles of neurorehabilitation including excellent chapters on learning and skill acquisition, outcome measurement and functional neuroimaging. The key clinical section comes next and includes updates and reviews on the management of the main neurological disabling physical problems such as spasticity, pain, sexual functioning and dysphagia. Cognitive, emotional and behavioural problems are just as important and are covered in the next section with excellent chapters for example on memory and management of executive dysfunction. The final part draws the sections on symptom management together by discussing the individual diseases that are most commonly seen in neurorehabilitation and providing an overview of the management of the disability associated with those disorders. The volume is a definitive review of current neurorehabilitation practice and will be valuable to a wide range of clinicians and scientists working in this rapidly developing field. A volume in the *Handbook of Clinical Neurology* series which has an unparalleled reputation as the world's most comprehensive source of information in neurology. International list of contributors including the leading workers in the field. Describes the advances which have occurred in clinical neurology and the neurosciences, their impact on the understanding of neurological disorders and on patient care.

**Educational Alternatives for Students with Learning Disabilities** Susan A. Vogel,2012-12-06 *Educational Alternatives for Students with Learning Disabilities* responds to the pressing need to provide teachers of learning disabled students with practical knowledge regarding state of the art intervention strategies. This book provides examples of validated alternative educational practices which avoid the pitfalls and stigmatizing effects on students of older models of intervention. The new practices aim to maximize teaching effectiveness and to assist the learning disabled in achieving their potential. The intervention strategies described in this book have the power to enhance the efforts of all
