disillusionment and mistrust that citizens feel toward government Daniels and his contributors believe that the relationship

between citizens and their governments can be changed by facilitating greater citizen collaboration with government

particularly through local sustainable programs As the case studies show often sustainable community programs are created

through grassroots movements that are initiated and managed by citizens themselves bringing them in contact with their

local elected and appointed officials Unlike traditional programs that are administered by local officials on behalf of their

citizens once sustainable community programs are created citizens administer their own programs in collaboration with local

officials The case studies look at a variety of sustainable programs primarily in the United States that help to deal with issues

such as recycling transportation microcredit site redevelopment pollution health care and hunger Creating Sustainable

Community Programs is the first book on sustainable programs that is intended for an audience of public administration

Decision-making in Urban Planning Ira M. Robinson, 1972 The systematic presentation of this book follows in a formal way a well-established paradigm of the planning process. It deals with the setting of goals, the formulation of alternatives, the prediction of outcomes and the evaluation of the alternatives in relation to the goals and the outcomes. From foreword:

*Comprehensive Urban Planning; a Selective Annotated Bibliography* Melville Campbell Branch, 1970 **Bulletin of the Brooklyn Public Library** Brooklyn Public Library, 1930 **Planning**, 1972 **Workbook for Preparing Or Updating a Master Plan And/or Preparing a Growth Management Plan**, 1992 *Managing Community Growth* Eric Kelly, 2004

Despite roughly thirty years of experience with growth management programs which are basically land use planning tools, most U.S. communities do not plan for how best to limit or manage rapid growth in fact, most communities do not plan at all. In the absence of planning, land use boards, regulators, and other governing bodies simply react to initiatives from the private sector. The result is predictably haphazard and does not allow communities to achieve such goals as protecting quality of life, attracting certain types of businesses while discouraging others, conserving wildlife or preserving open spaces and so forth. In contrast, planning by managing growth can help a town or city achieve any number of goals. But it is a complex task. This book

brings the benefit of state and local experiences with growth management to researchers students and particularly practitioners who seek guidance in these matters Kelly provides a much needed context from which any community can answer the following questions Does growth management work Is it appropriate for the community and the particular problems that it is trying to address Is one type of growth management program more appropriate than another for our community Will the program in question have undesirable or desirable side effects What are the likely effects of adopting no growth management program at all This work is invaluable for the citizen volunteers who sit on land use boards including planning and zoning commissions conservation commissions and inland wetlands agencies In addition it can aid mayors city managers and city councils in interviewing and selecting candidates for town planner

**Fair and Healthy Land Use** Craig Anthony Arnold, 2007

Lawsuits challenging the disproportionate effects of government decisions on low income and minority communities are on the rise Studies show that low income families and racial minorities are more likely to suffer from health issues related to pollution Grassroots environmental justice groups are increasingly fighting the siting of LULUs in low income and minority communities The principles these groups adopt are good planning principles that no person or neighborhood should be burdened by harmful environmental conditions and that all persons should have the opportunity for meaningful participation in the decisions affecting the health safety and identity of their community This report from APA's Planning Advisory Service explains how the principles of environmental justice can be incorporated into land use planning processes
