concept might be further explained. The third part presents thought provoking case studies and explores the implementation and impact of compassion in a range of healthcare settings. The fourth part investigates the role that organizations and their structures can play in promoting or hindering the provision of compassion. The book concludes by discussing how compassion may be taught and evaluated and suggesting ways for increasing the attention paid to compassion in health care. Developing a multi disciplinary theory of compassionate care and underpinned by empirical examples of good practice this volume is a valuable resource for all those interesting in understanding and supporting compassion in health care including advanced students academics and practitioners within medicine nursing psychology allied health sociology and philosophy.
