

The background of the cover features a complex, three-dimensional molecular structure. It consists of numerous blue spheres, representing atoms, connected by dark blue rods, representing chemical bonds. The structure is intricate, with various branching and ring-like formations, giving it a sense of depth and complexity. The overall color scheme is dominated by shades of blue and white, with the molecular structure appearing to glow against a lighter, hazy background.

to become expert problem solvers and critical thinkers Nivaldo Tro's Chemistry: A Molecular Approach presents chemistry visually through multi-level images: macroscopic, molecular, and symbolic representations to help students see the connections between the world they see around them, the atoms and molecules that compose the world, and the formulas they write down on paper. Interactive digital versions of select worked examples instruct students how to break down problems using Tro's unique Sort, Strategize, Solve, and Check technique and then complete a step in the example. To build conceptual understanding, Dr. Tro employs an active learning approach through interactive media that requires students to pause during videos to ensure they understand before continuing. The 5th Edition pairs digital pedagogical innovation with insights from learning design and educational research to create an active, integrated, and easy-to-use framework. The new edition introduces a fully integrated book and media package that streamlines course set-up, actively engages students in becoming expert problem solvers, and makes it possible for professors to teach the general chemistry course easily and effectively. Also available with Mastering Chemistry. By combining trusted author content with digital tools and a flexible platform, Mastering personalizes the learning experience and improves results for each student.
