## **Current Issues In Victimology Research Second Edition:**

Controversies in Victimology Laura Moriarty, 2008-10-01 *Controversies in Victimology* features original works of noted scholars and practitioners aiming to shed light on the debates over the media attention on and the psychology behind victimization. This book discusses the controversies from all sides of the debate and attempts to reconcile the issues in order to move the field forward.

**Current Issues in Victimology Research** Laura J. Moriarty, Robert A. Jerin, 2007 Research on crime victims issues is a relatively new phenomenon in the criminal justice field. With the birth of victimology in the late 1940s and early 1950s, research focused on victim-offender relationships and victim culpability. It has only been in the last few decades that researchers have both studied the effects of crime upon the victim and analyzed the services provided to the crime victim. In *Current Issues in Victimology Research*, Moriarty and Jerin provide an understanding of the criminal act's impact upon individuals and society through recent research. The book provides the criminal justice field with a foundation for grasping the complexities of crime victimization. *Current Issues in Victimology Research* serves well as a textbook for a victimology course or as a companion to any traditional text book. This new edition features the works of noted scholars and practitioners in the field who summarize the existing literature on victimology and its sub areas. Many of the chapters represent topical areas not covered in other volumes, and the original research contained in the chapters has not been published elsewhere. Moreover, each chapter represents a thorough, comprehensive, and up-to-date view of its subject matter. The eighteen chapters address current issues in victimology research, including victim services, victim perceptions of crime severity, effectiveness of batterer intervention programs, the intimidated witness, hate crimes, adolescent victimization, elder abuse, youth internet victimization, child fatality, campus crime, female stalkers, missing persons, and media responses to repeat victimization, curriculum development for victim assistance, academies, truancy, corrections, based restorative justice programs.

The SAGE Encyclopedia of Criminal Psychology Robert D. Morgan, 2019-04-25 *The SAGE Encyclopedia of Criminal Psychology* will be a modern interdisciplinary resource aimed at students and professionals interested in the intersection of psychology, e.g., social, forensic, clinical, criminal justice, sociology, and criminology. The interdisciplinary study of human behavior in legal contexts includes numerous topics on criminal behavior, criminal justice policies, and legal process, crime detection and prevention, eyewitness identification, prison life, offender assessment and rehabilitation, risk assessment and management, offender mental health, community reintegration, and juvenile offending. The study of these topics has been increasing continually since the late 1800s with people trained in many legal professions such as policing, social work, law, academia, mental health, and corrections. This will be a comprehensive work that will provide the most current empirical information on those topics of greatest concern to students who desire to work in these fields. This encyclopedia is a unique reference work that looks at criminal behavior primarily through a scientific lens. With over 500 entries, the book brings together top empirically driven researchers and clinicians across multiple fields: psychology, criminology, social work, and
