**Building A New Heritage (RLE**

**Tourism)** Gregory Ashworth, Peter Larkham, 2013-05-20 At the heart of the European debate lies the tension between the idea of European unity and individual state identities and nationalisms This volume provides an insight into this dichotomy by exploring the role of heritage in the new Europe The main theme of this book is that a number of possible heritages can be shaped from the European past depending on the purposes for which they are intended Through different methods of management intervention heritage can fulfil a variety of functions becoming a major commercial resource in the form of the tourism industry or enlisted in the creation and maintenance of place identities Leading contributors look at different perceptions of heritage by different cultures and the social and political consequences of heritage planning The nature of heritage planning for emerging spatially fragmented state structures is also discussed Tourism Development in Europe World Tourism Organization, 2007 This publication contains the proceedings of two UNWTO conferences on Tourism a Tool for Sustainable Development in Transitional Economies held in Belgrade on 20-21 June 2005 and Impact of European Union Enlargement on Tourism Development in Europe held in Vilnius on 1-2 March 2006 There is an overlap between economies in transition and the group of countries that joined the European Union in 2004 and from the perspective of tourism development a large group of European countries share similar challenges and opportunities While Europe is the region that receives the largest number of international tourists and registers the highest amount of receipts from international tourism there is a great difference between traditional destinations with a long history of tourism development and the countries that recovered independence after the collapse of the Soviet Union Some countries already undertook major reforms in their political and economic spheres while others are still addressing structural issues inherited from the past Tourism contributes positively to European integration and at the same time its success depends on the development and modernisation of several economic and social sectors *Cultural Heritage and Territorial Identity* Elisa Panzera, 2022-02-10 This book explores and substantiates the role of cultural heritage as an engine for local socio-economic development Starting from the assumption that cultural heritage represents a valuable unique and irreplaceable resource for European regions it identifies and quantitatively analyzes tourism and territorial identity as two different channels through which cultural heritage can influence local socio-economic development The book highlights the fact that cultural heritage not only has a positive influence on local cultures societies and environments but also plays a role in the process of local economic growth Providing comprehensive empirical evidence that explains and discusses whether and how the endowment of cultural heritage benefits local socio-economic growth it will appeal to scholars and students of cultural economics and regional science and anyone interested in sustainable socio-economic development
