Handbook of Research on Innate Leadership Characteristics and Examinations of Successful First-Time Leaders Guah, Matthew Waritay, 2021-02-05 For hundreds of years different leadership theories have been explored to try to explain exactly how and why certain people become great leaders Research spans a discussion of personality traits the characteristics of the situation at hand and qualifications of the leader to try to determine what causes people to become more likely than others to take charge This can be in various settings CEOs presidents and prime ministers managing directors governors senators head coaches and more Through the examination of first time leadership new theories and ideas on leadership are explored The Handbook of Research on Innate Leadership Characteristics and Examinations of Successful First Time Leaders is a comprehensive reference source that focuses on what qualities distinguish first time leadership from traditional leaders while furthering leadership theories that look at other variables such as situational factors knowledge base skill levels etc It reviews the various approaches used by first time leadership and how each of them uniquely approaches effective leadership key outcomes and the strengths and weaknesses of each approach Furthermore it

distinguishes between the traditional route for leadership the gradual moving up of an individual over time to higher positions and a first time leadership in which an individual begins right away in a position without climbing the professional ladder This book will attempt to draw lessons from existing first time leadership experience and provide evidence for the appropriateness of such a route to leadership Topics highlighted include transformational leadership political leaders ethical and unethical leadership and leadership development This book is ideal for young professionals leaders executives managers graduate students practitioners government officials researchers academicians and students The Marketer's Handbook Laurie Young,2011-04-22 This book written by a senior marketer with over thirty years experience of using marketing techniques and concepts sets out to describe contextualize and rate them Its prime emphasis is on understanding their status so that they can be used to direct the use of shareholder funds effectively Its conclusion is that seasoned professionals must use their judgement about when and how to use them but they also need to understand them in depth if they are going to make well rounded effective investment decisions Above all it asks how useful and relevant is this concept Will it improve decision making Does the damn thing have any credibility and does it work This book combines a rigorous review of a wide range of marketing concepts with many practical examples and case studies It can be read or dipped into both by seasoned professionals and by those just embarking on their marketing career Sir Paul Judge President Chartered Institute of Marketing Laurie Young casts an experienced and skeptical eye on many cherished marketing concepts and techniques He provides an antidote to the tendency to adopt them without understanding their limitations and possibilities Professor George Day The Wharton School Chairman of the American Marketing Association Laurie Young has produced nothing less than the A Z of marketing He has journeyed far and wide mapping out hundreds of business marketing and communications models to produce an extremely useful industry atlas Certainly it will find a well thumbed home on my bookshelf Hamish Pringle Director General Institute of Practitioners in Advertising This book is much needed by marketing Its value is in challenging concepts some of which have been the accepted norm for a long time But as this book shows some of these may no longer be relevant and appropriate for marketers in today s consumer environment Mike Johnston CEO Dairy Council of Northern Ireland and former Chairman of the Chartered Institute of Marketing Senior marketers like those who make up the membership of the Marketing Society hone the methods and techniques they favour as their career develops Laurie Young clearly did that and an experienced voice shines through this critique It is heartening to find that so many concepts have a long history of producing real value for businesses but alarming to find so many of the theorists favourites to be so groundless Hugh Burkitt CEO The Marketing Society **Interactive Political Leadership** Eva Sørensen,2020 Drawing on recent theories of interactive governance and political leadership this book develops a concept of interactive political leadership that aims to capture what political leadership looks like in a society of active anti authoritarian and politically competent citizens *Routledge International Handbook of Contemporary Racisms* John Solomos,2020-02-25 The study of

contemporary forms of racism has expanded greatly over the past four decades Although it has been a focus for scholarship and research for the past three centuries it is perhaps over this more recent period that we have seen important transformations in the analytical frames and methods to explore the changing patterns of contemporary racisms The Routledge International Handbook of Contemporary Racisms brings together thirty four original chapters from international experts that address key features of contemporary racisms The Handbook has a truly global orientation and covers contemporary racisms in both the western and non western geopolitical environments In terms of structure the volume is organized into ten interlinked parts that include Theories and Histories Contemporary Racisms in Global Perspective Racism and the State Racist Movements and Ideologies Anti Racisms Racism and Nationalism Intersections of Race and Gender Racism Culture and Religion Methods of Studying Contemporary Racisms and the End of Racism These parts contain chapters that draw on original theoretical and empirical research to address the evolution and changing forms of contemporary racism The Handbook is framed by a General Introduction and by short introductions to each part that provide an overview of key themes and concerns Written in a clear and direct style and from a conceptual multidisciplinary and international perspective the Handbook will provide students scholars and practitioners with an overview of the most pressing issues of Racisms in our time *Fatal Grievances* Gregory M. Vecchi, Mary Ann Markey, Jeffrey A.

Daniels, 2022-12-30 Active killer attacks frequently dominate the headlines with stories of seemingly random mass killings in school campus and workplace settings Nearly all of the attacks are over before the police can respond leaving unanswered questions as to why these attacks happen and what can be done to prevent them *Fatal Grievances* Forecasting and Preventing Active Killer Threats in School Campus and Workplace Settings takes a proactive view of active killer threat management and resolution to prevent the attack before it occurs Drawing from established threat assessment behavioral analysis and law enforcement negotiation theory and practice the book presents models and methods designed to forecast and prevent an active killer attack through the process of identification assessment and engagement This approach begins with definitions and orientations to violence the importance of the primacy of focusing on direct behaviors of planned lethal violence over other more indirect behaviors understanding how to identify a fatal grievance and that only fatal grievances result in planned lethal violence the importance of understanding the process of crisis intervention as the key to eliminating the fatal grievance and the motivation to kill and the use of time series predictive behavioral threat forecasting methods to prevent an active killer attack Case studies from within the United States US and abroad support this unique approach to threat assessment and make the concepts and principles accessible to professionals working in the fields of education human resources and security **ICT and International Learning Ecologies** Ian A. Lubin, 2021-06-21 Winner of the Outstanding Publication Award Book by AECT's Culture Learning and Technology Division *ICT and International Learning Ecologies* addresses new ways to explore international comparative and cultural issues in education and technology As today's

development orthodoxies push societies around the world to adopt imported information communication tools new approaches are needed that integrate cultural responsiveness autonomy and sustainability into technology enhanced learning This edited collection conceptually and methodologically reframes the complexities of teaching and learning in historically marginalized communities around the world where inequities are often exacerbated by one size fits all programs Graduate students and researchers of educational technology international comparative education and sustainability education will be better prepared to lead information and communication technologies ICT implementation across a range of contexts and learner identities
