Reading Comprehension Difficulties Cesare Cornoldi,Jane V. Oakhill,2013-04-03 Recognizing the characteristics of children with learning disabilities and deciding how to help them is a problem faced by schools all over the world Although some disorders are fairly easily recognizable e g mental retardation or very specific to single components of performance and quite rare e g developmental dyscalculia schools must consider much larger populations of children with learning difficulties who cannot always be readily classified These children present high

level learning difficulties that affect their performance on a variety of school tasks but the underlying problem is often their difficulty in understanding written text. In many instances despite good intellectual abilities and a superficial ability to cope with written texts and to use language appropriately some children do not seem to grasp the most important elements or cannot find the pieces of information they are looking for. Sometimes these difficulties are not immediately detected by the teacher in the early school years. They may be hidden because the most obvious early indicators of reading progress in the teacher's eyes do not involve comprehension of written texts or because the first texts a child encounters are quite simple and reflect only the difficulty level of the oral messages: sentences, short stories etc. with which the child is already familiar. However, as years go by and texts get more complex, comprehension difficulties will become increasingly apparent and increasingly detrimental to effective school learning. In turn, studying, assimilating new information and many other situations requiring text comprehension, from problem solving to reasoning with linguistic contents, could be affected. Problems with decoding, dyslexia and language disorders have attracted more interest from researchers than have specific comprehension problems and have occupied more room in specialized journals. Normal reading comprehension has also been a favorite with researchers. However, scarce interest has been paid to subjects who have comprehension difficulties. This book is an attempt to remedy this situation. In so doing, this volume answers the following questions: Does a reading comprehension problem exist in schools? How important and widespread is the problem? Is the problem specific? How can a reading comprehension difficulty be defined and identified? Does the syndrome have a single pattern or can different subtypes be identified? What are the main characteristics associated with a reading comprehension difficulty? When can other well identified problems add to our understanding of reading comprehension difficulties? Which educational strategies are effective in preventing and treating reading comprehension difficulties? What supplementary information can we get from an international perspective?

Play Diagnosis and Assessment Karen Gitlin-Weiner, Alice Sandgrund, Charles E. Schaefer, 2000-03-13 Through play children can express emotions that they cannot verbalise. This completely revised edition of a classic field-leading resource explains to clinicians how best to identify children's problems using play therapy techniques. **Routledge Encyclopedia of Narrative Theory** David Herman, Manfred Jahn, Marie-Laure Ryan, 2010-06-10 The past several decades have seen an explosion of interest in narrative with this multifaceted object of inquiry becoming a central concern in a wide range of disciplinary fields and research contexts. As accounts of what happened to particular people in particular circumstances and with specific consequences, stories have come to be viewed as a basic human strategy for coming to terms with time, process and change. However, the very predominance of narrative as a focus of interest across multiple disciplines makes it imperative for scholars, teachers and students to have access to a comprehensive reference resource. *Children and Communication* Barbara S. Wood, 1981 **Picture Books for the Literacy Hour** Guy Merchant, Huw Thomas, 2013-12-19 First Published in 2000. Over the last 30 years, growth in the popularity and provision of books for children has been remarkable. The quality and

inventiveness of children's authors and illustrators have led some to think of the picture book as a new art form. This book is a celebration of some of this work and it concentrates on the potential that picture books have for the teaching and learning of literacy. The aim of this book is to encourage colleagues to take a closer look at some of their favourite picture books and to see how they can be used as a starting point for enjoyable and challenging literacy work in primary classrooms. Believing that teachers do not need to rely on schemes to structure their English curriculum and with this in mind, this book includes 24 popular titles that have been identified in terms of their potential for delivering exciting text, sentence and word level work. Written to be used as a resource and anticipating that many readers will be most interested in the commentaries on the picture books contained in Chapters 3-7 and the accompanying photocopiable activity sheets.
