of biases include loss aversion confirmation bias and herd behavior How to identify and overcome these biases to make sounder financial decisions Our brains are incredible machines but they are also prone to making mistakes Cognitive biases are like optical illusions that distort our perception of reality By being aware of these biases we can take steps to counteract their effects and make more rational decisions Our financial habits are shaped by our experiences and beliefs The importance of developing healthy financial habits such as saving investing and planning for the future How to create new habits and break old financial habits Our financial habits are like paths we follow on autopilot If we want to change our financial results we need to change our paths By developing new positive financial habits we can transform our financial lives Financial psychology offers us a new perspective on money Instead of seeing money as an end in itself we can see it as a means to achieve our goals and live a more fulfilling life
