Computer Vision Using Local Binary Patterns Computational Imaging And Vision:
  Computer Vision Using Local Binary Patterns Matti Pietikäinen,Abdenour Hadid,Guoying Zhao,Timo Ahonen,2011-06-21 The recent emergence of Local Binary Patterns LBP has led to significant progress in applying texture methods to various computer vision problems and applications The focus of this research has broadened from 2D textures to 3D textures and spatiotemporal dynamic textures Also where texture was once utilized for applications such as remote sensing industrial inspection and biomedical image analysis the introduction of LBP based approaches have provided outstanding results in problems relating to face and activity analysis with future scope for face and facial expression recognition biometrics visual surveillance and video analysis Computer Vision Using Local Binary Patterns provides a detailed description of the LBP methods and their variants both in spatial and spatiotemporal domains This comprehensive reference also provides an excellent overview as to how texture methods can be utilized for solving different kinds of computer vision and image analysis problems Source codes of the basic LBP algorithms demonstrations some databases and a comprehensive LBP bibliography can be found from an accompanying web site Topics include local binary patterns and their variants in spatial and spatiotemporal domains texture classification and segmentation description of interest regions applications in image retrieval and 3D recognition Recognition and segmentation of dynamic textures background subtraction recognition of actions face analysis using still images and image sequences visual speech recognition and LBP in various applications Written by pioneers of LBP this book is an essential resource for researchers professional engineers and graduate students in computer vision image analysis and pattern recognition The book will also be of interest to all those who work with specific applications of machine vision   Local Binary Patterns: New Variants and Applications Sheryl Brahnam,Lakhmi C. Jain,Loris Nanni,Alessandra Lumini,2013-09-01 This book introduces Local Binary Patterns LBP arguably one of the most powerful texture descriptors and LBP variants This volume provides the latest reviews of the literature and a presentation of some of the best LBP variants by researchers at the forefront of textual analysis research and research on LBP descriptors and variants The value of LBP variants is illustrated with reported experiments using many databases representing a diversity of computer vision applications in medicine biometrics and other areas There is also a chapter that provides an excellent theoretical foundation for texture analysis and LBP in particular A special section focuses on LBP and LBP variants in the area of face recognition including thermal face recognition This book will be of value to anyone already in the field as well as to those interested in learning more about this powerful family of texture descriptors   *Image Processing And Analysis: A Primer* Georgy Gimel'farb,Patrice Delmas,2018-08-24 This textbook guides readers through their first steps into the challenging world of mimicking human vision with computational tools and techniques pertaining to the field of image processing and analysis While today s theoretical and applied processing and analysis of images meet with challenging and complex problems this primer is confined to a much simpler albeit critical collection of image to image

transformations including image normalisation enhancement and filtering It serves as an introduction to beginners a refresher for undergraduate and graduate students as well as engineers and computer scientists confronted with a problem to solve in computer vision The book covers basic image processing computer vision pipeline techniques which are widely used in today s computer vision computer graphics and image processing giving the readers enough knowledge to successfully tackle a wide range of applied problems **Image Analysis and Recognition** Aurélio Campilho,Fakhri Karray,2016-06-30 This book constitutes the thoroughly refereed proceedings of the 13th International Conference on Image Analysis and Recognition ICIAR 2016 held in P voa de Varzim Portugal in July 2016 The 79 revised full papers and 10 short papers presented were carefully reviewed and selected from 167 submissions The papers are organized in the following topical sections Advances in Data Analytics and Pattern Recognition with Applications Image Enhancement and Restoration Image Quality Assessment Image Segmentation Pattern Analysis and Recognition Feature Extraction Detection and Recognition Matching Motion and Tracking 3D Computer Vision RGB D Camera Applications Visual Perception in Robotics Biometrics Biomedical Imaging Brain Imaging Cardiovascular Image Analysis Image Analysis in Ophthalmology Document Analysis Applications and Obituaries The chapter Morphological Separation of Clustered Nuclei in Histological Images is published open access under a CC BY 4 0 license at link springer com **Beyond Databases, Architectures and Structures.
