Concept Explanation Bartosz Brozek:

The Concept of Causality in the Lvov-Warsaw School, 2022-10-04 In 1906 Jan ukasiewicz a great logician published his classic dissertation on the concept of cause containing not only a thorough reconstruction of the title concept but also a systematization of the analytical method It sparked an extremely inspiring discussion among the other representatives of the Lvov Warsaw School The main voices of this discussion are supplemented here with texts of contemporary Polish philosophers They show how the concept of cause is presently functioning in various disciplines and point to the topicality of ukasiewicz s method of analysis

Rights of Nature in Liberal Legal Systems and International Law Jasper Mührel, 2024-12-19 Rights of nature are on the rise worldwide having already been recognized in several states especially in Latin America and Asia For the first time in a monograph this book offers answers to the questions of whether and how rights of nature can also be implemented in Western liberal legal systems and in international law It traces how the latter are characterized by a deeply rooted anthropocentrism While at first glance this seems to make the recognition of rights of nature difficult to conceive the book shows that in the 21st century this strong anthropocentrism is neither helpful nor irrevocable and that non anthropocentric approaches can already be found in liberal legal systems and in international law Against the backdrop of the pressing environmental crises of the Anthropocene it offers liberal and international approaches to rights of nature In doing so the book analyzes the compatibility of rights of nature with Western liberal and international law and deals comprehensively with the criticism and potential benefits of rights of nature in order to ultimately provide concrete proposals for their implementation

Legal Interpretation in International Commercial Arbitration Joanna Jemielniak, 2016-04-22 This book fills a gap in legal academic study and practice in International Commercial Arbitration ICA by offering an in depth analysis on legal discourse and interpretation Written by a specialist in international business law arbitration and legal theory it examines the discursive framework of arbitral proceedings through an exploration of the unique status of arbitration as a legal and semiotic phenomenon Historical and contemporary aspects of legal discourse and interpretation are considered as well as developments in the field of discourse analysis in ICA A section is devoted to institutional and structural determinants of legal discourse in ICA in which ad hoc and institutional forms are examined The book also deals with functional aspects of legal interpretation in arbitral discourse focusing on interpretative standards methods and considerations in decision making in ICA The comparative examinations of existing legal framework and case law reflect the international nature of the subject and the book will be of value to both academic and professional readers

Research Handbook on the Law of Artificial Intelligence Woodrow Barfield, Ugo Pagallo, 2025-06-09 This second edition provides a broad range of perspectives on the legal implications of artificial intelligence AI across different global jurisdictions Contributors identify the potential threats that AI poses to the protection of rights and human wellbeing anticipating future developments in technological and legal infrastructures

Susan Haack: Reintegrating Philosophy

Julia F. Göhner, Eva-Maria Jung, 2016-02-26 This volume documents the 17th Münster Lectures in Philosophy with Susan Haack the prominent contemporary philosopher. It contains an original programmatic article by Haack on her overall philosophical approach entitled 'The Fragmentation of Philosophy: the Road to Reintegration'. In addition the volume includes seven papers on various aspects of Haack's philosophical work as well as her replies to the papers. Susan Haack has deeply influenced many of the debates in contemporary philosophy. In her vivid and accessible way she has made ground breaking contributions covering a wide range of topics from logic, metaphysics and epistemology to pragmatism and the philosophy of science and law. In her work Haack has always been very sensitive in detecting subtle differences. The distinctions she has introduced reveal what lies at the core of philosophical controversies and show the problems that exist with established views. In order to resolve these problems Haack has developed some middle course approaches. One example of this is her famous Foundherentism a theory of justification that includes elements from both the rival theories of Foundationalism and Coherentism. Haack herself has offered the best description of her work calling herself a 'passionate moderate'.

The Legal Mind Bartosz Brożek, 2020 How do lawyers think? Brożek presents a new perspective on legal thinking as an interplay between intuition, imagination and language.

The Concept of Explanation Bartosz Brożek, Michael Heller, Mateusz Hohol, 2016 The Concept of Explanation contains a collection of essays devoted to the problem of explanation in various disciplines of science and humanities, namely mathematics, physics, chemistry, biology, neuroscience, economics, as well as theology. The issues covered include such topics as the interplay between explanation and understanding, the problem of a priori explanation, the limits of causal explanations in physics, the application of mathematics in biology, the relationship between proof and explanation in mathematics, the use of mechanistic framework in neuroscience viewed from the perspective of philosophy of science. Moreover, various methodological controversies related to science and humanities are considered.

Mind Bartosz Brożek, Jacob Cornelis Hage, Jaap Hage, Nicole Vincent, 2021-04-29 This volume offers a novel look at the intricate relationship between the cognitive sciences and various dimensions of the law. Methods of Legal Reasoning Jerzy Stelmach, Bartosz Brożek, 2006-09-03 Anyone reflecting on the methodology of legal reasoning faces a difficult task. The number of methodological theories in jurisprudence and the vast literature on the subject are not the only problems that have to be taken into account. Perhaps the most striking difficulty concerning the methodology of legal argument is the heated debate between jurists, legal theorists and philosophers of law that has been recurring since at least nineteenth century. Therefore a justification is needed for writing yet another book concerning the methods of legal reasoning, a book that aims to cover a lot of what has already been proposed in legal theory. We believe that there is such a justification. First the

perspective that we adopt in the present book is unique at least in some respects. We venture to look at the methodology of legal reasoning from the outside, i.e. from a more general philosophical perspective while taking into account the hardness of law. This perspective enables us to ask questions about the justification for the methods of legal argument presented. Second, we do not want to defend one paradigmatic conception of legal reasoning. On the contrary, we put forward the thesis that there is a plurality of argumentative methods. The plurality however does not lead to relativism in legal decision making. Third, we reject any hierarchy of the methods of legal reasoning and take the view that one can speak only of the precision and flexibility of different methodologies.

Supervenience and Normativity Bartosz Brożek, Antonino Rotolo, Jerzy

Stelmach, 2017-09-04 The present collection represents an attempt to bring together several contributions to the ongoing debate pertaining to supervenience of the normative in law and morals and strives to be the first work that addresses the topic comprehensively. It addresses the controversies surrounding the idea of normative supervenience and the philosophical conceptions they generated deserve a recapitulation as well as a new impulse for further development. Recently there has been renewed interest in the concepts of normativity and supervenience. The research on normativity a term introduced to the philosophical jargon by Edmund Husserl almost one hundred years ago gained impetus in the 1990s through the works of such philosophers as Robert Audi, Christine Korsgaard, Robert Brandom, Paul Boghossian or Joseph Raz. The problem of the nature and sources of normativity has been investigated not only in morals and in relation to language but also in other domains e.g. in law or in the context of the theories of rationality. Supervenience understood as a special kind of relation between properties and weaker than entailment has become analytic philosophers favorite formal tool since 1980s. It features in the theories pertaining to mental properties but also in aesthetics or the law. In recent years the marriage of normativity and supervenience has become an object of many philosophical theories as well as heated debates. It seems that the conceptual apparatus of the supervenience theory makes it possible to state precisely some claims pertaining to normativity as well as illuminate the problems surrounding it.

Russian Legal Realism Bartosz Brożek, Julia Stanek, Jerzy

Stelmach, 2019-01-07 This edited volume explores ideas of legal realism which emerge through the works of Russian legal philosophers. Apart from the well known American and Scandinavian versions of legal realism there also exists a Russian one. Readers will discover fresh perspectives and that the collection of early twentieth century ideas on law discussed in Russia can be understood as a unified school of legal thought as Russian legal realism. These chapters by renowned European and Eastern European legal philosophers add to ongoing discussions about the nature of law especially in the context of developments around our scientific knowledge about the mind and behaviour. Analyses of legal phenomena carried out by legal realists in Russia offer novel arguments in favour of embracing psychological and sociological perspectives on the law. The book includes analysis of the St Petersburg school of legal philosophy and Leon Petrazycki's psychological theory of law. This original and multifaceted research on Russian realists is of considerable value to an international audience. Researchers

and postgraduate students of law legal theory and legal ethics will find the book particularly appealing but it will also interest those investigating the philosophy or sociology of law or legal history **Rule-following** Bartosz Brożek, 2013 This comprehensive study deciphers the practice of rule following with the use of the tools offered by both contemporary philosophy and neuroscience The book claims in the Wittgensteinian spirit that rule following cannot be thought of in terms of individual mental states only In order to explain what rules are one needs to consider rule following to be a communal practice This stance is backed by some evolutionary scenarios and neuroscientific theories The book culminates in an explication of rule following in language morality and mathematics
