it and meticulously thought out proposals for change By breaking down the concepts of flexibility and legal certainty into a set of policy objectives and assessment criteria the author thoroughly examines such core aspects of the framework as the following the justifications for exceptions e g safeguarding the fundamental rights of users the regimes established in legislation and case law for key exceptions the need to promote technological development the importance of avoiding re fragmentation caused by uncoordinated national legislative responses to technological changes the legal status of digital technologies that rely on unauthorised uses of copyright protected works and the pros and cons of importing a fair use standard modelled after that of the United States In an invaluable concluding chapter the author puts forward a set of reform proposals articulating their advantages and responding to potential objections In doing so the chapter also identifies synthesises and critically examines the various proposals that have been advanced in the academic literature In its decisive contribution to the debate around the InfoSoc Directive and the rules that guide its implementation interpretation and application this book isolates the contentious structural features of the framework and examines them in a critical fashion The author s systematised review of scholarly and policymaking proposals for increasing flexibility and legal certainty in EU copyright law will be welcomed by practitioners in intellectual property law and other areas of economic law as well as by interested policymakers and scholars

*Challenges of Copyright in the Digital Age* Arpi Abovyan, 2014-06-26 The adaption of copyright law to the digital age is currently one of the EU s main concerns regarding intellectual property This thesis analyses whether European legislation in this field can be successfully implemented in the same way in countries with different levels of development Taking the examples of Germany and Armenia will help to evaluate the problems of developed and transition countries concerning the challenges of copyright in the digital age The comparison between these two countries shows that a one size fits all approach is not appropriate in the digital environment The socio economic situation and the legal environment of transition countries call for a different solution In this respect the example of Armenia may be instructive for other transition countries as well especially CIS countries A recommendation for adopting a certain system for drafting European legislation in the future which will meet the needs of all countries considering their social economic and legal situation has been developed in this thesis
