Concrete The Vision Of A New Architecture

William J. R. Curtis

Concrete The Vision Of A New Architecture:

Concrete Peter Collins, 2004 Collins provides a thorough history of the new nineteenth century material and goes on to examine the theories on its architectural expression focussing on determining role of the reinforced concrete frame He argues that Perret provides the first rational and effective expression of classical principles in modern construction Published in 1959 and out of print since 1975 this new edition of *Concrete* includes a foreword by Kenneth Frampton a scholarly introduction by R jean Legault and several additional essays on Perret by Peter Collins From the Foreword by Kenneth Frampton *Concrete* remains a valuable historical text that in many respects has never been given its due It is an unmatched pioneering history of the development of reinforced concrete up to 1914 It records and analyses the densely articulated if provincial English debate with respect to the aesthetic challenge posed by the increasing popularity of concrete from around 1870 onwards Finally until very recently it was the only readily available monograph on Auguste Perret in English In this regard it is particularly valuable as a thorough and perceptive assessment of Perret s life and career one that still stands as a point of departure for all current attempts to situate this seminal architect within the wider trajectory of twentieth century culture
