Concurrent Programming C. R. Snow, 1992 This textbook is designed as a first book on concurrent programming for computer science undergraduates and provides a comprehensive introduction to the problems of concurrency Concurrency is of vital importance in many areas of computer science particularly in operating systems It is also

increasingly being taught in undergraduate courses The book builds on the student s familiarity with sequential programming in a high level language which will make it very accessible to computer science students The book is concerned mainly with the high level aspects of concurrency which will be equally applicable to traditional time sliced or more recent truly parallel systems *Concurrent Programming in Java* Douglas Lea,2007 **Start Concurrent** Barry Wittman,Aditya Mathur,Tim Korb,2013-12-30 Multicore microprocessors are now at the heart of nearly all desktop and laptop computers While these chips offer exciting opportunities for the creation of newer and faster applications they also challenge students and educators How can the new generation of computer scientists growing up with multicore chips learn to program applications that exploit this latent processing power This unique book is an attempt to introduce concurrent programming to first year computer science students much earlier than most competing products This book assumes no programming background but offers a broad coverage of Java It includes 159 numbered and numerous inline examples as well as 301 exercises categorized as conceptual programming and experiments The problem oriented approach presents a problem explains supporting concepts outlines necessary syntax and finally provides its solution All programs in the book are available for download and experimentation A substantial index of 5 039 entries makes it easy for readers to locate relevant information In a fast changing field this book is continually updated and refined The 2013 version is the sixth draft edition of this volume and features numerous revisions based on student feedback **Concurrent Programming** Tom Axford,1983
