Critical Care Nursing Patricia Gonce Morton,1998 This book is organized into five parts the first two of which cover areas applicable to all critical care patients including the patient s and family s experience education pain management ethical and legal issues and the rewards and challenges of critical care nursing The third part addresses specific populations including pediatric patients pregnant women older adults and postanesthesia patients as well as interfacility transport The balance of the book is arranged by body systems and concludes with multisystem problems This is the seventh edition of a text first published in 1973 and last published in 1994 The purpose is to present current comprehensive and practical information built on a holistic perspective of care in which the patient is the core of nursing practice This book meets a need for educating students and nurses in the

critical care environment. The editors' objective of providing a framework for focusing on patient responses in the critical care environment is met. This book is intended for students in critical care, educators, and clinicians. This edition is also tailored to meet the needs of patients. The editors are excellent authorities in critical care nursing. All three are practitioners and one is both practitioner and educator. The contributors and reviewers are critical care experts. The illustrations are used best to understand critical care technology. The graphics used for anatomy, physiology, and patient assessment add to the usefulness of the text. The references are pertinent and current, but certain specialty content would need to be updated by the reader, e.g., medication protocols for CHF. The use of color in the text is managed carefully to guide and not overpower the reader. The 1997 ACLS Guidelines are in Appendix 1. The Answer Key to Study Questions appears in Appendix 2. Anatomy and physiology, patient assessment, and clinical management nursing research, collaborative plans of care, teaching, and home care issues are some of the innovations presented. One strength of the book is how it addresses the changes associated with aging and the needs of the older adult. Aging concerns are covered in one chapter and are highlighted throughout the text. This edition provides current information that makes the previous edition out of date. I would recommend this text for beginning critical care nurses and for undergraduate nursing students for its coverage of advanced pathophysiological concepts.

Enjoying the Song of Expression: An Emotional Symphony within **Core Curriculum For Perianesthesia Nursing Practice 4e**

In some sort of eaten by displays and the ceaseless chatter of fast connection, the melodic beauty and mental symphony developed by the published term usually diminish into the backdrop, eclipsed by the persistent noise and disturbances that permeate our lives. But, set within the pages of **Core Curriculum For Perianesthesia Nursing Practice 4e** a wonderful literary prize filled with raw feelings, lies an immersive symphony waiting to be embraced. Crafted by an elegant musician of language, this interesting masterpiece conducts visitors on a psychological journey, well unraveling the concealed melodies and profound influence resonating within each carefully constructed phrase. Within the depths of the poignant assessment, we can discover the book's main harmonies, analyze their entralling writing design, and submit ourselves to the profound resonance that echoes in the depths of readers' souls.
