

EYELINER

To apply eyeliner like a pro, the secret is to to get the right tools. In addition, practice makes perfect, but the tools you use have a big impact on your results. For example, choose your eyeliner based on your eye shape. If your eyes are hooded, a liquid eyeliner will work best. If your eyes are deep-set, a pencil eyeliner will work best.

The practice will allow you to understand the best eyeliner technique for your eye shape or your choice.

PREP YOUR EYES

EYEBROWS

How to do eyebrows depends on your natural eyebrow shape, but there are three main types of eyebrows: arch, flat, and hooded. If you want a more permanent style for your eyebrows, the arch and flat shapes usually look best.

Which Eyebrow Shape is Best?

First look at your natural eyebrows. If they are flat, go for a flat brow shape. If they are arch, go for an arch. If they are hooded, go for a hooded brow shape.

For example, if you have hooded eyebrows, go for a hooded brow shape.

Create this brow shape by drawing where your brow looks, based on your eye shape. Then, clean the brow with a brow pencil.

Close this brow shape by drawing where your brow looks, based on your eye shape. Then, clean the brow with a brow pencil.

EYESHADOW

The next step is eye makeup. Getting to know your eye shape (the deep-set, hooded, close-set, round, almond, diamond) is important to properly pick the right eye makeup. The best way to enhance your natural beauty with a makeup artist is to enhance your features with a makeup artist.

THE BASIC EYESHADOW TECHNIQUE

Next, I'll cover a basic eyeshadow technique that I believe every makeup artist should know.

It is also great for beginners and a great technique for everyone.

1. Start by applying an eyeshadow primer.
2. Next, take a medium shade and apply it all over the eyelid. Make sure to blend well and go back and forth until you reach the desired shade.
3. After that, take a darker but still medium shade like a copper and with a more intense shade (brown, beige) it can be the center of a smokey eye.
4. Finally, take a light beige shade and apply it to the inner corner of the eye. This creates a highlighter that looks behind the eyes and the inner corner of the eye.

It's now time to apply some eyeshadow to your eye for looks. If you're a beginner, just build that eyeshadow on the outer corner.

You can now match this basic technique with the range of color of your eyeshadow, and enhance this look with powder, blush, or gloss for example.

The right shade for you.

There is a straightforward trick to identify your skin tone very quickly.

Find the natural light of the sun, and look at your skin, looking the other side.

All the colors in makeup are false, but the skin tone is true. If you glow, the makeup is perfect for you. If you don't, then it's time to switch to a different shade.

If your veins are blue and your skin has a reddish-orange undertone, your skin will have a blue undertone.

If you find your veins, blue-purple and blue, you'll have a blue, undertone, while blue veins have a purple undertone.

If your veins are orange, you'll have a reddish-orange undertone, while blue veins have a reddish-orange undertone.

In general, the perfect foundation shade for you is a shade similar to your skin tone with the same undertones.

PRO TIP: Draw your foundation first with your fingers before applying it to your face to estimate it and get better results on the skin.

PREP THE SKIN BEFORE MAKEUP

Do you need to do every single step every time you do your makeup?

The most important step is to clean your face. This is the most important step in the morning, but you should do this at night, too.

And, you should regularly apply face wash. It helps to remove your skin of dirt and oil.

After that, take all the previous products used on the face.

Remember to use a toner for your skin.

The only exception is when you are doing makeup for night events.

We don't want to use toner because it can make our face look white or ghost-like with dust.

The next step is to use a primer according to your skin type.

BEAUTY SECRET: *Don't skip this step.*

Concealer

This step is crucial to get makeup, especially the skin, perfect.

With 1 or 2 drops of liquid concealer or covering the under-eye area and the other hand in your face that needs more coverage.

Remember, concealer and foundation will mix as they both will want to become facial imperfections, but there are also any differences between the two.

Thickness Concealer

• **Thickness Concealer:** This is a lot thicker than foundation, so it's good for under-eye areas, dark circles, and blemishes. It's also good for covering the skin under the eyes.

• **Light Concealer:** This concealer is thicker, it will usually have better coverage than your foundation, which means it's best to focus it into the problem areas of your face.

• **Other Concealer:** Most foundations do not cover blemishes, but there are some concealers that are specifically designed to cover blemishes. Your skin has to help reduce the look of redness, or blemishes.

Concealer

Concealer comes in different formulas such as cream, liquid, and the most popular one, liquid concealer.

PRO TIP: *Draw your concealer first with your fingers before applying it to your face to estimate it and get better results on the skin.*
