Civilized Life in the Universe George Basalla, 2006-01-19 From Plutarch and Kepler to Stephen Hawking and Carl Sagan this book offers a fascinating history of scientific speculation about life in outer space Basalla traces an unbroken but twisting chain of ideas passed from one scientist to the next and from science to popular culture He even examines the influence of popular culture on science Sagan always admitted how much Burroughs Martian novels influenced his speculations about Mars Throughout Basalla shows that scientific belief in and search for extraterrestrial civilizations is a complex impulse part secularized religious and part anthropomorphic

Oracles of Science Karl Giberson, Mariano Artigas, 2009-02-27 *Oracles of Science* examines the popular writings of the six scientists who have been the most influential in shaping our perception of science how it works and how it relates to other fields of human endeavor especially religion Biologists Stephen Jay Gould Richard Dawkins and Edward O Wilson and physicists Carl Sagan Stephen Hawking and Steven Weinberg have become public intellectuals articulating a much larger vision for science and what role it should play in the modern worldview The scientific prestige and literary eloquence of each of these great thinkers combine to transform them into what can only be called oracles of science Their controversial often personal sometimes idiosyncratic opinions become widely known and perceived by many to be authoritative Curiously the leading oracles of science are predominantly secular in ways that don't reflect the distribution of religious beliefs within the scientific community Many of them are even hostile to religion creating a false impression that science as a whole is incompatible with religion Karl Giberson and Mariano Artigas offer an informed analysis of the views of these six scientists carefully distinguishing science from philosophy and religion in the writings of the oracles This book will be welcomed by many who are disturbed by the tone of the public discourse on the relationship between science and religion and will challenge others to reexamine their own preconceptions about this crucial topic
