Cosmos, Bios, Theos Henry Margenau, Roy Abraham Varghese, 1992 Stranger and more momentous than the strangest of scientific theories is the appearance of God on the intellectual horizon of contemporary science From Einstein Planck and Heisenberg to Margenau Hawking and Eccles some of the most penetrating modern minds have needed God in order to make sense of the cosmos **Cosmos, Bios, Theos** ed. Margenau, 1993 *Cosmos, Bios, Theos* Henry Margenau, Roy Abraham Varghese, 1992 Stranger and more momentous than the strangest of scientific theories is the appearance of God on the intellectual horizon of contemporary science From Einstein Planck and Heisenberg to Margenau Hawking and Eccles some of the most penetrating modern minds have needed God in order to make sense of the cosmos *The Philosophical, Scientific, and Historical Evidence for God* David Scott Nichols M.D., 2021-12-28 The Evidence for God For approximately one hundred years most secular scientists and the majority of the intelligentsia in the world have preached that God does not exist Darwin's book *The Origin of the Species* published in 1859 was the primary impetus for this change in our world's viewpoint away from God Today many leaders in academia look at Christians and others who believe in God as bereft of intelligence At the onset of the 20th century there was very little scientific evidence to suggest that God was the Creator of the Universe However since 1917 amazing evidence has been discovered in the fields of cosmology and biology that a significant number of secular scientists admit points to an incredible Creative Force most call this Force God *The Philosophical Scientific and Historical Evidence for God* presents this evidence in a detailed yet understandable manner This book Dr Nichols eleventh on theology provides well researched information showing the ever increasing evidence for an omnipotent Creator He considers it to be the magnum opus of his writing career The significance of the Big Bang theory and the many weaknesses now recognized in the theory of evolution will be thoroughly reviewed Philosophical and historical evidence for God will also be presented Dr Nichols is convinced that an open minded reader will come away with the realization that God does indeed exist and that He is the God of the Holy Bible *Darwin's Leap of Faith* John Ankerberg, John Weldon, 1998 The award winning team of John Ankerberg and John Weldon examines the many facets of the creation versus evolution controversy As discoveries are made about the universe some evolutionists now admit that much of the new evidence favors creation Fascinating and informative this comprehensive guide is perfect for Christians creation skeptics and those curious about the debate [A Universe From Someone](#)19 Peter S. Williams, 2022-10-27 After a substantial author's preface recounting Peter S Williams's life journey with the question of God's existence *A Universe From Someone* pulls together essays and ongoing speeches from debates including the 2011 God is not a delusion debate at the Cambridge Union that jointly cover a wide variety of theistic arguments Together with a foreword by noted philosopher J P Moreland an annotated bibliography highlighting Four Dozen Key Resources on Apologetics and Natural Theology in an Age of Science and other recommended resources *A Universe From Someone* offers an informed overview of the contemporary case for God **What is Life?** Josef

Seifert,2021-11-15 This book makes four bold claims 1 life is an ultimate datum open to philosophical analysis and irreducible to physical reality hence all materialist reductionist explanations most current theories of life are false 2 All life presupposes soul entelechy without which a being would at best fake life 3 The concept of life is analogous and the most direct access to life in its irreducibility is gained through consciousness 4 All life possesses an objective and intrinsic value that needs to be respected human life possesses beyond this an inviolable dignity Life and personal life are pure perfections it being absolutely better to possess personal life than not to possess it Chapter 1 the metaphysical essence and the many meanings of life as well as its transcendental character Chapter 2 the irreducibility of biological life its amazing empirical and philosophically intelligible essential features and the ways of knowing them Chapter 3 the immediate evidence and indubitable givenness of mental conscious life as well as questions of brain death and immortality Chapter 4 the inviolable objective dignity of personal life and its self transcendence a new theory of the fourfold source of human dignity and rights Chapter 5 in dialogue form methods and results of philosophy versus those of empirical life sciences **Creation or**

Evolution? Michael Ebifegha,2011-03-31 Were humans created or did they evolve This debate continues to rage between science and religion In Creation or Evolution author Michael Ebifegah examines these two worldviews within the framework of science He examines the constraints of science as an explanatory framework for the origin of species and compares the contemporary world to a hypothetical world under the influence of evolutionary processes and agency Additionally he considers the irrelevance of the earths age to the creationist evolutionist controversy He stresses that knowledge of the intersection between the origin of life and the origin of species is required to establish the latter Ebifegah augments the natural selection discussion in light of Fodor and Piattelli Palmarinis work and addresses sciences limitations in deploying similarity dissimilarity arguments in the debate about creationism versus evolutionism Finally he focuses on the lack of historical evidence to justify an evolutionary worldview Creation or Evolution discusses how the M theory and Charles Darwins paradigm of evolution by natural selection are outside the limits of science Ebifegah shows that we must look beyond the inadequacy of such theories and address the validity of science as the sole avenue of inquiry *Theos,*

Anthropos, Christos Roy Abraham Varghese,2000 *Theos Anthropos Christos* A Compendium of Modern Philosophical Theology is an anthology of 21 essays two thirds of them appearing for the first time by noted thinkers who rigorously deploy the tools of modern thought to re examine and restate the central insights of classical philosophy In natural theology the contributors address the challenge of influential varieties of skepticism while developing a cogent and coherent framework of thought to defend the existence as well as the simplicity immutability goodness and infinity of God In philosophy of mind they counter modern materialisms with an extensive defense of the existence of a mental reality which is radically nonphysical In moral philosophy the contributors consider the contradictions of relativism and the application of rationally defensible norms to contemporary ethical debates The final section comprises a critique of syncretism in comparative religion and a

phenomenological analysis of the New Testament's Jesus **God, the Science, the Evidence** Michel-Yves Bollere, Olivier Bonnassies, 2025-10-14 After four years of research in partnership with over twenty scientists and esteemed experts this book explores one of the most significant questions we face the existence or non existence of a creator God For more than four centuries the scientific discoveries of Copernicus Galileo Darwin and Freud created the impression that we could explain the workings of the Universe without the idea of a creator God By the beginning of the twentieth century materialism had become the dominant theory of the time And yet with unexpected and astonishing force the pendulum of science has swung back in the other direction owing to a rapid succession of discoveries the theory of relativity quantum mechanics the Big Bang the theories of expansion heat death and fine tuning of the universe This newly acquired knowledge has upended the certainties of the twentieth century collective consciousness Once the only acceptable theory materialism is increasingly considered an irrational belief The authors of this highly readable book retrace the fascinating history of these scientific breakthroughs and offer a rigorous overview of the new proof of the existence of God God the Science and the Evidence is an invitation to reflect and debate the place of God in science Stepping Stones to Christianity Peter S. Williams, 2025-10-17 Stepping Stones to Christianity introduces a rational case for Christianity in three steps starting with scientific arguments for design in cosmology and biology moving on to philosophical arguments for the existence of God and closing with an overview of the evidence for a Christian understanding of the historical Jesus in the context of competing contemporary worldviews By bringing together revised and expanded versions of materials written to introduce three of the author's Essays on books with Wipf Stock Stepping Stones to Christianity equips readers to consider the case for design in nature to investigate philosophical arguments for God and to wrestle with the identity of Jesus *The Angel Or the Beast* Michael Bradburn-Ruster, 1995 **Communication & Cognition** ,1996 Mind ,1993 Issues for 1896 1900 contain papers of the Aristotelian Society *Conservative Judaism* ,2000 **International Philosophical Quarterly** ,1993 **Islamic Thought and Scientific Creativity** ,1995 *Thoughts on Synthesis of Science and Religion* Thoudam Damodara Singh, Samaresh Bandyopadhyay, 2001 Mostly revised version of papers presented at the Second World Congress for the Synthesis of Science and Religion held at Calcutta in January 1997 It also contains articles and messages contributed by other luminaries of the world **Vatican Observatory Publications** ,1970 **Who's who in Theology and Science** ,1996
