This study examined 10th grade English language arts ELA classes co taught by an ELA and special education teacher and tenth grade ELA classes solo taught by the same ELA teacher. The researcher aimed to determine if co teaching affected general education student achievement in general education classrooms with mainstreamed special education students. Using independent t tests and an ANCOVA the statistical analyses indicated no significant difference in achievement on the 2013 California Standards Test CST 2013 California High School Exit Examination CAHSEE and 2012 2013 district benchmark assessment in ELA between general education students who received instruction in a co taught classroom and general education students who received instruction in a solo taught classroom.
