Bragg, 1926 *The University of Maine Studies* University of Maine at Orono, 1927 **International Conference on Martensitic Transformations** Juha Pietikäinen, Outi Söderberg, 2003 Computational Science - ICCS 2009 Gabrielle Allen, Jaroslaw Nabrzyski, Edward Seidel, Geert Dick van Albada, Jack Dongarra, Peter M.A. Sloot, 2009-05-20 There is something fascinating about science. One gets such wholesale returns of conjecture out of such a trifling investment of fact. Mark Twain. Life on the Mississippi. The challenges in succeeding with computational science are numerous and deeply affect all disciplines. NSF's 2006 Blue Ribbon Panel of Simulation Based Engineering Science SBES states researchers and educators agree computational and simulation engineering sciences are fundamental to the security and welfare of the United States. We must overcome difficulties inherent in multiscale modeling, the development of next generation algorithms, and the design of dynamic data driven application systems. We must determine better ways to integrate data intensive computing, visualization, and simulation. Importantly, we must overhaul our educational system to foster the interdisciplinary study. The payoff from meeting these challenges are profound. The International Conference on Computational Science 2009 ICCS 2009 explored how computational sciences are not only advancing the traditional hard science disciplines but also stretching beyond with applications in the arts, humanities, media, and all aspects of research. This interdisciplinary conference drew academic and industry leaders from a variety of fields including physics, astronomy, mathematics, music, digital media, biology, and engineering. The conference also hosted computer and computational scientists who are designing and building the better infrastructure necessary for next generation computing. Discussions focused on innovative ways to collaborate and how computational science is changing the future of research. ICCS 2009 Compute Discover Innovate was hosted by the Center for Computation and Technology at Louisiana State University in Baton Rouge.
