[Plant Tissue Culture, Development, and Biotechnology](#) Robert N. Trigiano, Dennis J. Gray, 2011-06-30 Under the vast umbrella of Plant Sciences resides a plethora of highly specialized fields. Botanists, agronomists, horticulturists, geneticists, and physiologists each employ a different approach to the study of plants and each for a different end goal. Yet all will find themselves in the laboratory engaging in what can broadly be termed biotechnology. Addressing a wide variety of related topics *Plant Tissue Culture, Development, and Biotechnology* gives the practical and technical knowledge needed to train the next generation of plant scientists regardless of their ultimate specialization. With the detailed perspectives and hands on training signature to the authors previous bestselling books *Plant Development and Biotechnology* and *Plant Tissue Culture Concepts and Laboratory Exercises* this book discusses relevant concepts supported by demonstrative laboratory experiments. It provides critical thinking questions, concept boxes highlighting important ideas and procedure boxes giving precise instruction for experiments including step by step procedures such as the proper microscope use with digital photography along with anticipated results and a list of materials needed to perform them. Integrating traditional plant sciences with recent advances in plant tissue culture development and biotechnology chapters address germplasm preservation, plant growth regulators, embryo rescue, micropropagation of roses, haploid cultures, and transformation of meristems. Going beyond the scope of a simple laboratory manual this book also considers special topics such as copyrights, patents, legalities, trade secrets and the business of biotechnology. Focusing on plant culture development and its applications in biotechnology across a myriad of plant science specialties this text uses a broad range of species and practical laboratory exercises to make it useful for anyone engaged in the plant sciences

[Cultural Heritage, Sustainable Development and Human Rights](#) Laura Pineschi, 2023-12-04 The importance of cultural heritage in both its tangible and intangible forms to sustainable development and its economic, social and environmental components is increasingly evident in the recent practice of intergovernmental and non-governmental organizations at the universal and regional level. Due consideration for the integration of the cultural dimension in the implementation of Agenda 2030 has begun to grow in various international fora including initiatives to emphasize the role and contribution of tangible and intangible heritage as drivers and enablers of sustainable development. It has also been recognized that the inherent links between cultural heritage and sustainable development cannot be correctly

addressed without taking into account their various implications for the effective enjoyment of all human rights including cultural rights This book offers a thorough academic investigation on the importance of cultural heritage to sustainable development and cultural rights from an international law perspective Providing an in depth review of the possible intersections between cultural heritage sustainable development and cultural rights and the limits of the current legal and institutional framework it will be of interest to researchers and scholars of international law cultural heritage law environmental law and human rights law Developing Cultures Lawrence E. Harrison,Jerome Kagan,2006 **Jews, Confucians, and Protestants** Lawrence E. Harrison,2012-12-16 Multiculturalism the belief that no culture is better or worse than any other it is merely different has come to dominate Western intellectual thought and to serve as a guide to domestic and foreign policy and development aid But what if multiculturalism itself is flawed What if some cultures are more prone to progress than others and more successful at creating the cultural capital that encourages democratic governance social justice for all and the elimination of poverty In Jews Confucians and Protestants Cultural Capital and the End of Multiculturalism Lawrence E Harrison takes the politically incorrect stand that all cultures are not created equal Analyzing the performance of 117 countries grouped by predominant religion Harrison argues for the superiority of those cultures that emphasize Jewish Confucian and Protestant values A concluding chapter outlines ways in which cultural change may substantially transform societies within a generation Developing Cultures Lawrence E.
